## **Mechanical Engineering Lab Manual Automobile Engineering:**

Automobile Engineering Dr. Sushil Kumar Choudhary, Dr. Pramod Kumar Mishra, Automobile engineering is the one of the subject of mechanical and automobile engineering branch It deals with the various types of automobiles their mechanism of transmission systems and its applications Basically all the types of vehicles works on the principle of internal combustion processes Different types of fuels are burnt inside the cylinder at higher temperature to get the transmission motion in the vehicles It deals with the design and creation of vehicles used as means of transportation by road Essentially it derived from mechanical engineering More specifically it is the branch of engineering that deals with the design development manufacturing production testing repairing control and management of automobiles It is a combination of different elements of mechanical engineering electrical engineering electronic engineering software engineering and safety engineering Therefore every mechanical and automobile engineering student should have the knowledge of automobile engineering its mechanism and its various applications This Automobile engineering lab manual deals with everything about automobiles and practices to propel them Lab Manual ,2022-12-28 Engineering education in India in general is being revamped so as to impart the theoretical knowledge along with industrial exposure It is our attempt when we are introducing a new Lab Manuals to bridge the industry academia gap To enable this we have introduced components such as skill based laboratories and project based learning This will allow the learner to apply knowledge gained in previous and current semesters for gaining better understanding What once were pure mechanical systems have now been transformed into multidisciplinary labs IOT HEV FEA CNC 3D Printing and Industrial electronic Interdisciplinary knowledge is gaining importance as we are moving towards automated world as technology advances Keeping this in mind the Lab Manual has been designed in a way so that learner shall be acquainted with many Interdisciplinary subjects Automobile Engineering is one of the fastest growing sectors with lots of inventions and innovations happening The challenges for our budding engineers would be manifold when electric vehicles are already gaining popularity and driverless cars becoming a reality Engineers develop new technological solutions During the engineering design process the responsibilities of the engineer may include defining problems conducting and narrowing research analyzing criteria finding and analyzing solutions and making decisions The Objective of the Lab Manual in Automobile Engineering to embed a strong foundation in Automobile Engineering fundamentals to Identify Solve Analyze and design real time engineering problems as a professional and entrepreneur for benefits of society
