What is the difference between Restorative and Palliative procedures?

Restorative procedures aim to restore the body's normal function by repairing or replacing damaged parts. Palliative procedures, on the other hand, aim to relieve symptoms and improve quality of life for patients with serious illnesses, but do not cure the disease itself.

Nurse responsibilities

What role does the nurse play in obtaining consent?

The nurse plays a crucial role in obtaining consent. They are responsible for ensuring that the patient understands the procedure, its risks and benefits, and that the patient is making an informed decision. The nurse also witnesses the patient's signature on the consent form.
