Media Tipping Points Analyzing And Predicting Global Events:

DATA MINING: Predicting Tipping Points Dr. Philip Gordon, PhD, 2013-01-31 Tipping Points as evidenced in global events are in many ways influenced by media DATA MINING for predicting and analyzing world events. This just released ground breaking book DATA MINING PREDICTING TIPPING POINTS by Dr Philip Gordon Ph D details three case studies which were selected on the basis of common Tipping Point Attributes. Each involved media contagiousness and stickiness during their development and each arrived at a dramatic moment in time which could only be characterized by the phenomenon of Tipping Points. Three recent case studies explore the leading edge technologies of DATA MINING and the theory of TIPPING POINTS. The first case study the 2008 Presidential Campaign of Barack Obama was chosen to examine a narrower scope and timeframe for the application of the analysis. In contrast to the second case study the International Financial Crisis of 2007-2010 which involves a broader data study period to identify trends and more complex issues. The third study Climate Change was included as consideration because the data mining research and analysis revealed critical relationships between Media Impact and Global Events. As the issue of Climate Change is still evolving Dr Gordon provides a Data Mining and Tipping Point Theory methodology for analyzing and predicting our planets most pressing Global Tipping Points. Review Comments: The genius of the formulation of DATA MINING PREDICTING TIPPING POINTS is that it takes explicit account of the role of social media and the internet at facilitating bifurcations and promoting dynamical instability. In effect we have trimmed a few feet of tail off the kite. As a reader I was informed and educated as to the factors which conspire to influence stability instability in complex social systems the book does a good job of making sense of past bifurcations and dynamical instabilities namely political instability our perception of global climate change and international economic crises. My compliments on a truly insightful Media Tipping Points Prof Dr med Peter S Geissler A B B S M S M Phil Ph D Yale M A M Eng M S Ph D M S M D M Phil Cantab A truly fascinating book that teaches a whole new way of thinking about major events and how the media can influence them. Being a political junkie I was heavily into the media coverage of the 2008 Obama election and the global financial meltdown both via TV and the blogosphere I now find myself looking for the tipping points and stickiness factors as other key events unfold. Usually I have trouble reading theoretical books but this one was an easy read and if you want supporting data then the references are there. This could become a solid reference for those in the media who truly want to understand what they are reporting. Highly recommended and I look forward to Dr Gordon's ongoing analysis of future events. Dr Ralph Moorhouse Ph D Political junkie Expert natural polymers for industries The application of Data Mining and Tipping Point Theory to media and global events particularly the financial crisis and climate change is a fascinating one.
