or approaches like EJB Nevertheless these approaches suffer from certain limitations concerning in particular transparency and object orientation While existing database programming languages integrate the relational model Hibernate and EJB 3 x does not support polymorphism in general EJB 2 x does not even support inheritance In addition although they try to the approaches except by some database programming languages are not transparent In this work transparency means that arbitrary types may become persistent Moreover algorithms remain unchanged whether they are executed on transient or persistent objects Finally users can work with persistency on a very high level Since there are so many currently developed frameworks trying to solve the integration problem of XML and persistency into object oriented programming languages the need for a holistic and transparent object oriented database programming language seems to be there The starting point of XOBEDBPL which stands for XML OBjEcts Database Programming Language is the predecessor project XOBE XOBE concentrates on the integration of XML objects and XPath as the query language for these objects The most important feature of XOBE is that each XML operation is statically type checked against the declared XML schema In XOBEDBPL the XML integration is extended regarding the manipulation of XML objects Before XML objects could only be queried but not updated The static type checking idea is kept and enhanced to include updates While XOBE s intentions lie on the development of web applications all objects can remain transient XOBEDBPL is supposed to deal with persistent objects as well **Intelligent Systems Design and Applications** Ajith Abraham,Katrin Franke,Mario Köppen,2013-12-20 ISDA 03 General Chair s Message On behalf of the ISDA 03 organizing committee I wish to extend a very warm welcome to the conference and Tulsa in August 2003 The conference program committee has organized an exciting and invigorating program comprising pres entations from distinguished experts in the field and important and wide ranging contributions on state of the art research that provide new insights into Current Innovations in Intelligent Systems Design and Applications ISDA 03 builds on the success of last years ISDA 02 was held in Atlanta USA August 07 08 2002 and attracted participants from over 25 countries ISDA 03 the Third International Conference on Intelligent Systems Design and Applications held during August 10 13 2003 in Tulsa USA presents a rich and exciting program The main themes addressed by this conference are Architectures of intelligent systems Image speech and signal processing Internet modeling Data mining Business and management applications Control and automation Software agents Knowledge management ISDA 03 is hosted by the College of Arts and Sciences Oklahoma State Univer sity USA ISDA 03 is technically sponsored by IEEE Systems Man and Cyber netics Society World Federation on Soft Computing European Society for Fuzzy Logic and Technology Springer Verlag Germany Center of Excellence in In formation Technology and Telecommunications COEITT and Oklahoma State University ISDA 03 received 117 technical paper submissions from over 28 countries 7 tutorials 3 special technical sessions and 1 workshop proposal *Database Systems for Advanced Applications* Kian Lee Tan,Vilas Wuwongse,2006-03-11 This book constitutes the refereed proceedings of the 11th International Conference on Database Systems for Advanced Applications
