9. Alarm 1 Indicators: Displays when alarm 1 is set and goes off.
10. Alarm 2 Indicators: Displays when alarm 2 is set and goes off.

### 1. LED Status Indicator

1. Wall mount hole
2. RESET
3. Channel Number (1 ~ 3)
4. Battery compartment
5. (Battery compartment cover not shown)

### GETTING STARTED

Batteries are not supplied with this product. You will need to purchase 3 x LR03 (AAA) 1.5V alkaline batteries for the main unit, and 3 x LR03 (AAA) 1.5V alkaline batteries for the remote sensor.

Insert batteries before first use, matching the polarity as shown in the Battery compartment. For best results, replace batteries in the remote sensor before the main unit. Press RESET after each battery change.

**WARNING:** Do not use rechargeable batteries.

**NOTE:** shown on LCD display when batteries are low.

1. Press and hold MODE for 2 seconds to enter setting mode.
2. Press or to change settings.
3. Press MODE to exit.

Product can stand on a table or the back of the mount/stand with a mat.

### REMOTE SENSOR (TH-91120P)

The sensor unit is supplied with a ThermoCouple Thermistor (not rechargeable) and can be connected to a TH-91120P remote sensor to extract additional temperature data. Additional sensors sold separately.

#### To set up your remote sensor:

1. Open the remote sensor battery compartment with a small Phillips screwdriver.
2. Insert the batteries, matching the polarity (+ and -) as shown in the battery compartment.

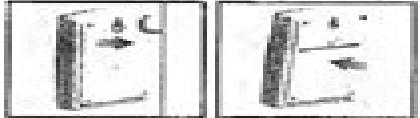

**NOTE:** Standard alkaline batteries contain significant amounts of water. Because of this they will freeze in low temperatures of approximately 10°F (-12°C). Disposable Lithium batteries have a much lower threshold for temperatures with an estimated freezing range of below 40°F (4°C). The Digital Indoor/Outdoor Thermometer uses two rechargeable batteries to -20°F (-28°C) with adequate power.

Wireless range can be improved by raising the remote unit off the battery and temperatures. Because cold temperatures may temporarily reduce the wireless range. Because the sensor unit has been selected, it has worse performance due to low temperatures, the unit will resume proper functioning as the temperature rises to within the system temperature range (the permanent damage will occur at the end due to low temperatures).

3. Set the channel switch to any channel. The switch is located in the battery compartment.

SWITCH	SET CHANNEL
Channel	Channel 1 ~ 3. If you are using more than one sensor, select a different channel for each sensor.

4. Place the sensor near the main unit. Press MODE on the sensor, then, press CHANNEL and MODE at the same time on the main unit to initiate signal sending between the sensor and the main unit. The reception icon on the main unit will blink for approximately 3 minutes while it is searching for the sensor. (Refer to the **SEARCH** section for more information.)
5. Close the remote sensor battery compartment.
6. Secure the sensor to the desired location using the wall mount or table stand.

#### For best results:

- Insert the batteries and select the channel and temperature unit before you mount the sensor.
- Place the sensor out of direct sunlight and moisture.
- Do not place the sensor more than 30 meters (98 feet) from the main (clock) unit.
- Position the sensor so that it faces the main (clock) unit.
- When the sensor is in direct sunlight, wind, and humidity away from metallic or electronic objects.
- Position the sensor close to the main unit during cold weather because as the temperature rises battery performance may affect transmission.

You may need to experiment with various locations to get the best results.

#### SEARCH (SEARCHING FOR SENSORS)

Press to send from the sensor every 40 seconds. The reception icon in the Temperature Area shows the status.

ICON	DESCRIPTION
	Main unit is searching for sensors.

All icons 1 centimeter/scale bar.
