## Origins Consciousness Understand Leading Reality:

**Paroimia and Parrēsia in the Gospel of John** Thomas Tops,2022-02-07 The language of the Gospel of John is known for its complexity On the basis of the modern standards of transparency and logic previous scholars have depicted this language as obscure confusing and mysterious Thomas Tops goes beyond these oversimplifications by providing an in depth historical study of John s characterisation of Jesus language with the terms paroimia and parrēsia By providing original insights in these terms the author offers a new perspective on the functioning of Johannine language As the Johannine Jesus teaches both through paroimia and parrēsia his language conceals and reveals at the same time His criticism is veiled and calls on its addressees to search for the hidden meanings of his words Veiled speech allows the Johannine Jesus to criticise his opponents and openly reveal his messianic identity to those who cannot accept the truth in any other way [The Human Mind](#) Valentin Matcas,2014-10-16 It is nice to learn how mysterious and complex the human mind is who discovered the synapse when in what specific university and what everyone was doing that day but what you really want to know is how your mind functions how you reason how you have your feelings and ideas and how your mind affects you in every detail You want to know exactly what happens in your mind when you watch the painting of Renoir with the beautiful woman wearing the white dress and playing the grand piano and why it makes you enjoy a beautiful moment then compared to watching sofas and armchairs You want to know all details related to how a simple yellow car on the road can remind you of your best friend and of all the loving moments that you once had through what cognitive mechanisms it happens and even more you want to know why it reminds you of your friend sometimes while other times it associates with work rain and shopping How exactly does the mind know all these Since it is interesting as it happens while it remains at an unconscious level and you just cannot find out how it takes place in order to be able to control it and use it whenever you desire You want to know exactly how you are able to predict the displacement of a tennis ball in order to hit it perfectly in an instant giving its exact speed direction and angular momentum necessary to win and doing so long before your conscious mind even perceives the ball How can your subconscious do so without your conscious mind while the conscious mind should be more capable and therefore better prepared according to science What is the exact cognitive mechanism Because if you can only know it all your strategies in life can become flawless You want to know exactly how your mind is able to solve advanced mathematical problems and how it retrieves on its own the proper knowledge in order to perform very abstract operations How does everything happen How do you have your ideas in mathematics business and art What is the human creativity and how can the human mind achieve it at will and in all domains What exactly makes your brain perform better or worse under all circumstances and why exactly is reasoning different in everybody How do you perform abstract thinking How do you imagine How exactly does your mind generate plans and strategies related to important future events How do you comprehend and enjoy various topics in psychology literature mathematics art and music How do you love How does everything happen within your mind brain and

the entire organism Because this is of interest this is what you want to know while this is what you actually need in life since without these you cannot understand your mind the extraordinary human mind And since your mind and reasoning integrate you in life and in the world now you cannot understand yourself life the world and your place and meaning in life and in the world without understanding the human mind along with the human reasoning While it is meaningful to know these well otherwise you end up doing everything else instead of reasoning accurately developing entirely and behaving adequately in life and in the world Since ignorance always harms the world while now it even has its own cause the lack of accurate knowledge about the human mind Throughout this book we create a comprehensive mental model for the human mind including its structure abilities development interconnectivity reasoning and further meanings allowing you to understand yourself and your entire cognition If you want to understand the human mind in all its meaningful details this book is for you

*Who Are You, Really?* Joshua Rasmussen,2023-03-21 What does it mean to be human Philosopher Joshua Rasmussen offers a step by step examination into the fundamental nature and ultimate origin of persons Using accessible language and clear logic he argues that understanding what it means to be a person sheds light not only on our own nature but also on the existence of the one who gave us life **The Origins of Moral Theology in the United States** Charles E. Schade,1899 **Foucault and the History of Philosophical Transcendence** Christopher Falzon,2024-09-19 In an original approach to Foucault s philosophy Christopher Falzon argues for a reading of Foucault as a philosopher of finite transcendence and explores its implications for ethics In order to distinguish Foucault s position Falzon charts the historical trajectory of transcendence as a philosophical concept starting with the radical notion of transcendence that was introduced

by Plato and which reappears in various forms in subsequent thinkers from the Stoics to Descartes and from Kant to Sartre. He argues that Foucault's critique of the transcendent subject of humanism is a rejection not of transcendence per se but of radical transcendence in its distinctively modern form. As such he shows how Foucault's conceptualisation of transcendence as finite enables a picture of the human being as neither fully determined nor a creature of infinite possibilities but as both subject and object affected by but also able to affect the world. With the notion of finite transcendence Falzon captures the essence of Foucault's unique philosophy and provides a new insight into his contribution to ethics. Demonstrating its contemporary relevance Foucault and the History of Philosophical Transcendence further explores the potential application of Foucault's approach to the current ecological crisis. Franca Ovadje, Samuel Aryee, 2018-08-06. Although change management and therefore effective adaptation to environmental complexity is considered a uniquely human cultural activity the extensive change management literature is largely based on the experiences of organizations in the advanced economies of the West. As the economies of African countries become increasingly open African organizations will need to be agile in order to adapt and grow in a dynamic global environment. Currently there is a dearth of contextualized knowledge on change management within Africa but this handbook aims to address this by bringing together a wide range of experts to explore organizational change and change management from an African context. The handbook adopts a multidisciplinary historical, philosophical, processual and strategic perspective as well as empirical accounts of change management. It addresses such issues as: What are the external and internal pressures for change? What is the content and process of change management? What are the essentials of effective change management? How can change management be theorized from an African perspective? What sort of leadership can best align with change management demands in an African context? How do organizations build internal change management capability? It is hoped that answers to these questions contained in the handbook will provide a contextualized understanding of change management which African organizations and scholars can leverage to respond to the threats and opportunities inherent in their increasingly dynamic environment. The handbook should constitute an essential reference for academics, researchers

and advanced students of change management development studies and African studies as well as practitioners
