Ordinary Magic Ann S. Masten, 2025-05-21 Fully updated with key advances in theory methods and research the second edition of this landmark work features an expanded conceptual framework and a more global perspective on threats to human development including climate change war poverty racial injustice and pandemics Pioneering resilience expert Ann S Masten illuminates the ordinary but powerful processes that allow many children exposed to trauma and adversity to survive adapt and even thrive The book traces fundamental adaptive systems that have evolved and function synergistically at the neurobiological psychological social community and cultural levels Using a range of case examples to illustrate complex concepts Masten provides a cogent resilience framework for promoting positive development in children at risk

New to This Edition Advances in neurobiology more international including non Western findings and examples new discussions of cultural identity development up to date intervention research and more Heightened focus on the interactions of multiple systems including families schools culture and communities in supporting children s resilience Increased attention to the impact of structural inequality poverty and intergenerational trauma Coverage of rapidly emerging threats the risks posed to children by multisystem cascading disasters such as the COVID 19 pandemic

Resilience, Development and Global Change Katrina Brown, 2015-12-14 Resilience is currently infusing policy debates and public discourses widely promoted as a normative goal in fields as diverse as the economy national security personal development and well being Resilience thinking provides a framework for understanding dynamics of complex inter connected social ecological and economic systems The book critically analyzes the multiple meanings and applications of resilience ideas in contemporary society and to suggests where how and why resilience might cause us to re think global change and development and how this new approach might be operationalized The book shows how current policy discourses on resilience promote business as usual rather than radical responses to change But it argues that resilience can help understand and respond to the challenges of the contemporary age These challenges are characterized by high uncertainty globalized and interconnected systems increasing disparities and limited choices Resilience thinking can overturn orthodox approaches to international development dominated by modernization aid dependency and a focus on economic growth and to global environmental change characterized by technocratic approaches market environmentalism and commoditization of ecosystem services

Resilience Development and Global Change presents a sophisticated theoretically informed synthesis of resilience thinking across disciplines It applies resilience ideas specifically to international development and relates resilience to core theories in development and shows how a radical resilience based approach to development might transform responses to climate change to the dilemmas of

managing forests and ecosystems and to rural and urban poverty in the developing world The book provides fresh perspectives for scholars of international development environmental studies and geography and add new dimensions for those studying broader fields of ecology and society

A Generation at Risk? Robyn Pharoah, 2004 The problem of children left orphaned and vulnerable by HIV AIDS is receiving increasing attention worldwide Yet even as the global community acknowledges the human tragedy that orphaning on the scale heralded by the HIV AIDS epidemic represents it is widely speculated that large numbers of orphans may themselves represent a security challenge By reducing the resources available to children and destabilising the institutions on which they depend such as the family school and community it is argued that HIV AIDS may severely affect children's development creating generations of disenfranchised and potentially dysfunctional young people left with little alternative but engage in criminal and other threatening activities
