Health Promotion in the Universities and Other Educational Settings Miguel Corbí, Antoni Aguiló, Carmen Gallardo Pino, Mario Del Libano, Carlos Emanuel Rodríguez-Díaz, Hiram V. Arroyo Acevedo, 2025-09-17 The promotion of health in universities is of great importance as it allows for the encouragement of healthy lifestyles and the prevention of diseases among students teaching staff and administrative personnel. The university is a conductive environment for the promotion of healthy habits since firstly it is usually the moment when the students make decisions under their responsibility and secondly it is a place where academic sports and social activities take place so it is also an ideal moment to promote changes that can be transferred to society and the rest of the individual's life. Health promotion in universities can cover several areas such as healthy eating, physical exercise, prevention of addictions, emotional and social mental health among others. It can also involve the entire university community from students to administrative and teaching staff. In the case of students it is essential as it is a period of change and habit formation and the fact that they will be the future decision makers of society.

### **Handbook of Approach and Avoidance Motivation**

Andrew J. Elliot, 2013-05-13 Of the many conceptual distinctions present in psychology today the approach avoidance distinction stands out as one of if not the most fundamental and basic. The distinction between approach and avoidance motivation has a venerable history not only within but beyond scientific psychology and the deep utility of this distinction is clearly evident across theoretical traditions, disciplines and content areas. This volume is designed to illustrate and highlight the central importance of this distinction to serve as a one stop resource for scholars working in this area and to facilitate integration among researchers and theorists with an explicit or implicit interest in approach and avoidance motivation. The main body of this volume is organized according to seven broad sections that represent core areas of interest in the study of approach and avoidance motivation including neurophysiology and neurobiology and evaluative processes. Each section contains a minimum of four chapters that cover a specific aspect of approach and avoidance motivation. The broad applicability of the approach avoidance distinction makes this Handbook an essential resource for researchers, theorists and students of social psychology and related disciplines.
