EBOOK: Principles and Practices of Marketing 10/e

JOBBER AND ELLI, 2023-02-21 *EBOOK Principles and Practices of Marketing 10 e* **Running with Power: Why Would You?** Steve Bateman, 2024-03-22 Is power the next great running metric? Power, which measures your effort, how hard you're running, is becoming more popular. All of the major running watch manufacturers include wrist-based power in their new models, and the number of runners using power in the World Marathon Majors has doubled every year since 2016. Running with Power, you can Run your Personal Best based on your measured fitness, not just a hopeful finish time. Maximise your training gains while minimising injury risk. Improve your fatigue resistance to run harder for longer. Measure the effectiveness of drills, plyometrics, or strength work. Power may be the next great running metric. But that isn't what this book is about. This book answers the question: Why would you Run with Power? Written by an England Athletics certified coach who's been using power since 2018, it explores what running with power is, what's different about power, and the benefits why you should use it. Running with Power is based on decades of research and practice, packaged as a set of powerful models and metrics that can be used to guide your training and racing more effectively than Heart Rate or Pace. All of which leads to the question: Why wouldn't you Run with Power?

Value Co-Creation in Web 3.0 Robin Qiu, 2026-01-01

This book explores the architecture and framework for co-creating the most valuable and promising data in the future Internet, often referred to as Web 3.0, from the end user's perspective. Unlike the current platform economy, where user's daily usage and activity data is predominantly held by individual organizations, Web 3.0 advocates for decentralized data management across interconnected platforms. This approach aims to fully utilize the vast amounts of data generated by the increasingly connected physical world. The book explains how Web 3.0 can be developed with fundamental and technological support to enhance decentralized data

management and maximize benefits for end users. Additionally, it presents two use cases to illustrate how value co-creation can be achieved using Web 3.0. The book is aimed primarily at students from business and engineering schools. It also serves as a valuable teaching resource for instructors in management information systems, MIS, information systems, information science, and technology and data and computing sciences. Additionally, professionals interested in digital transformation, blockchain technology, data analytics, AI, and digital economy policymaking will find it highly relevant.

Evaluation of Weight Management Apps Max Amelang,2022-05-30 Master s Thesis from the year 2021 in the subject Communications Technical Communication grade 1 2 Technical University of Ilmenau language English abstract Introduction

Obesity is a contributing factor to many diseases and is becoming a growing problem worldwide. Many apps have been developed to assist users in improving their weight management. However, given the speed at which apps are created, it is crucial to assess their quality regularly. Objectives: This study aimed to evaluate the quality of weight management apps using comprehensive quality assessment criteria. By doing so, the information quality (RQ1) and system quality (RQ2) were determined, and relationships between these elements, user ratings and app downloads (RQ3) were examined. Methods: A systematic search in the US App Store using search terms related to weight management was performed. System quality was assessed using the Mobile App Rating Scale (MARS) and rated on a 5 point scale. The Taxonomy of Behavior Change Techniques (BCTs) was used to determine their presence or absence. A second reviewer coded 50% of the apps to account for interrater reliability. The descriptive and inferential statistical data analyses were carried out with SPSS. Results: A sample of N=38 apps was deemed eligible for this review. On average, 9.6 BCTs were identified per app, range 3-19. The most frequently used BCTs were Provide instructions (87%) and Prompt self monitoring (87%). The MARS overall quality scores indicated moderate system quality (M=3.48, SD=6.1). Functionality was the highest scoring MARS domain (M=3.52, SD=6.8), while Aesthetics (M=3.40, SD=8.4) scored the lowest. Significant positive correlations were identified between the overall MARS score, the number of BCTs and app downloads.

Conclusion: Establishing a standardized framework for quality evaluation would increase the comparability of assessments and the significance for users. Based on the present findings, future app development should involve more health professionals, integrate more evidence based content and incorporate more effective BCTs for weight management.
