The increasing societal dependence on information technology has pushed cybersecurity to the forefront as one of the most urgent challenges facing the global community today. Poor cybersecurity is the primary reason hackers are able to penetrate safeguards in business computers and other networks and the growing global skills gap in cybersecurity simply exacerbates the problem. **Global Cyber Security Labor Shortage and International Business Risk** provides emerging research exploring the theoretical and practical aspects of protecting computer systems against online threats as well as transformative business models to ensure sustainability and longevity. Featuring coverage on a broad range of topics such as cybercrime, technology, security training and labor market understanding, this book is ideally designed for professionals, managers, IT consultants, programmers, academicians and students seeking current research on cyber security's influence on business education and social networks.

**Business Week**, 2001    *The Michigan Journal*, 2012    **A Cultural History of Shopping in the Modern Age** Vicki Howard, Jon Stobart, 2022 In the modern consumer age that emerged after the First World War, shopping became a ubiquitous cultural practice. Despite its apparent universality, the historicity and contingency of shopping should not be ignored: its meaning was always inextricably linked to the political, material and economic contexts within which it took place. Gendered female for the most part, shopping continued to evoke different cultural responses: embraced as liberatory by some, condemned as frivolous by others. Business decisions and public policies helped construct the frameworks within which new, often American-led shopping cultures emerged from downtown department stores to chain stores to suburban shopping malls. The digital revolution in shopping that began in the last decade of the twentieth century has changed the face of cities and towns and led to the closure of many bricks and mortar stores, but as this volume explores, the shopper remains very much at the centre of Western capitalist societies. **A Cultural History of Shopping in the Modern Age** presents an overview of the period with themes addressing practices and processes, spaces and places, shoppers and identities, luxury and everyday, home and family, visual and literary representations, reputation, trust and credit, and governance, regulation and the state. Book jacket    **The Times Index**, 2011 Indexes the Times, Sunday Times and magazine, Times literary supplement, Times educational supplement, Times educational supplement, Scotland and the Times higher education supplement    **Retailing** Dale M. Lewison, David Wesley Balderson, 1999 Appropriate for courses in principles of retailing or retail management at colleges and universities. This thorough Canadianization of a best selling US text continues the tradition as one of the most comprehensive and contemporary texts on the subject of retailing. The text examines contemporary issues, explores many challenging problems and investigates the myriad of changes that retailers must struggle with as they enter the twenty first century.
