**Policy Innovations for Transformative Change** Katja Hujo, Harald Braumann, 2016 The 2030 Agenda for Sustainable Development and the Sustainable Development Goals are a global commitment to transforming our world and eradicating poverty in all its forms everywhere The challenge now is to put this vision into action Policy Innovations for Transformative Change the UNRISD 2016 Flagship Report helps unpack the complexities of the 2030 Sustainable Development Agenda in a unique way by focusing on the innovations and pathways to policy change and analysing which policies and practices will lead to social economic and ecological justice Drawing on

numerous policy innovations from the South the report goes beyond buzzwords and brings to the development community a definition of transformation which can be used as a benchmark for policy making toward the 2030 Agenda intended to leave no one behind Bringing together five years of UNRISD research across six areas social policy care policy social and solidarity economy eco social policy domestic resource mobilization and politics and governance the report explores what transformative change really means for societies and individuals *Michigan Law Review* ,2017-06 Labour Markets, Institutions and Inequality Janine Berg,2015 Labour market institutions including collective bargaining the regulation of employment contracts and pension and other social protection policies are instrumental for improving the well being of workers and their families as well as societies Yet in many countries these institutions have been eroded in other countries they do not exist This edited volume examines the importance of these institutions for ensuring equitable income distribution including with empirical examples from both developed and developing countries It also analyses the connections between macroeconomic policies and inequality as well as how specific groups women migrant workers youths are affected by labour market institutions **Resource Efficiency** Paul Ekins,Nick Hughes,2016 Despite enormous progress in the past decades towards improving human prosperity and well being this has come at the lasting cost of degradation of the natural environment and depletion of natural resources Meeting the needs of a growing and increasingly affluent population will require natural resource extraction to increase from 85 to 186 billion tons by 2050 This can cause irreversible environmental damage and endanger the capacity of Earth to continue to provide resources which are essential for human survival and development Analysis in the report shows that policies and initiatives to improve resource efficiency and tackle climate change can reduce global resource extraction by up to 28 per cent while also boosting the value of world economic activity by 1 per cent in 2050 against the baseline Such policy actions can also cut global greenhouse gas emissions by around 60 per cent in 2050 relative to 2015 levels This report has been produced by the UNEP s International Resource Panel in response to a request by leaders of the G7 nations in the context of efforts to promote resource efficiency as a core element of sustainable development The report conducts a rigorous survey to assess and articulate the prospects and solutions for resource efficiency It considers how more efficient use of resources can contribute to economic growth employment and development at the same time as reducing the world s use of materials energy biomass and water and the resulting environmental impacts The report documents many examples of best practices for increasing the resource efficiency of different sectors from countries around the world The challenge for policy makers is to learn from and scale up these good practices and to conceive and implement a set of transformative policies that will enable countries to reap the associated social environmental and economic benefits Trade Policy Review ,2017 African Research & Documentation ,2015 *California Agriculture* ,2018 *The Digital Doctor: Hope, Hype, and Harm at the Dawn of Medicine's Computer Age* Robert Wachter,2015-04-10 The New York Times Science Bestseller from Robert Wachter Modern Healthcare s 1 Most

Influential Physician Executive in the US While modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive For the past few decades technology has been touted as the cure for all of healthcare's ills But medicine stubbornly resisted computerization until now Over the past five years thanks largely to billions of dollars in federal incentives healthcare has finally gone digital Yet once clinicians started using computers to actually deliver care it dawned on them that something was deeply wrong Why were doctors no longer making eye contact with their patients How could one of America's leading hospitals give a teenager a 39 fold overdose of a common antibiotic despite a state of the art computerized prescribing system How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point Logically enough we've pinned the problems on clunky software flawed implementations absurd regulations and bad karma It was all of those things but it was also something far more complicated And far more interesting Written with a rare combination of compelling stories and hard hitting analysis by one of the nation's most thoughtful physicians The Digital Doctor examines healthcare at the dawn of its computer age It tackles the hard questions from how technology is changing care at the bedside to whether government intervention has been useful or destructive And it does so with clarity insight humor and compassion Ultimately it is a hopeful story We need to recognize that computers in healthcare don't simply replace my doctor's scrawl with Helvetica 12 writes the author Dr Robert Wachter Instead they transform the work the people who do it and their relationships with each other and with patients Sure we should have thought of this sooner But it's not too late to get it right This riveting book offers the prescription for getting it right making it essential reading for everyone patient and provider alike who cares about our healthcare system
