China and the Internet Song Shi, 2023-12-15 Two oversimplified narratives have long dominated news reports and academic studies of China's Internet one lauding its potentials to boost commerce the other bemoaning state control and measures against the forces of political transformations This bifurcation obscures the complexity of the dynamic forces operating on the Chinese Internet and the diversity of Internet related phenomena China and the Internet analyzes how Chinese activists NGOs and government offices have used the Internet to fight rural malnutrition the digital divide the COVID 19 pandemic and other urgent problems affecting millions of people It presents five theoretically informed case studies of how new media have been used in interventions for development and social change including how activists battled against COVID 19 In addition this book applies a Communication for Development approach to examine the use and impact of China's Internet Although it is widely used internationally in Internet studies Communication for Development has not been rigorously applied in studies of China's Internet This approach offers a new perspective to examine the Internet and related phenomena in Chinese society

Ternicode: Law of Three Prashant A U, 2022-07-28 The conceptual framework presented in this book is a first of its kind in the sense that it provides a robust yet simple way of determining the underlying aspect of various matters which have always daunted the human psyche The novel narrative is captivating and invokes the inquisitiveness of the reader seeking to acquire a formidable understanding of the overall environment Ternicode as the title goes is in itself a lexical or semantic neologism This new term strikes an immediate chord resonating the trigeminal relationship of factors associated with any phenomena It intends to resolve all complexities and conflicts that emerge with the conventional methods of logic and reasoning The author has taken care not to oversimplify the arguments presented

while maintaining a sensible flow of information that provides valuable insight into the inherent nature of things that matter but appear elusive to our general understanding It would not be an understatement to say that through the careful analysis of prominent personalities across numerous fields the author indeed makes a powerful impact that shakes the foundations of traditional methods of leadership management Last but not the least as they say Do not judge a book by its cover this book has hidden jewels served on a platter for those who are starved of food for the mind **North & South** ,2005 **Concrete International** ,2008 *Kutlwano* ,2008-07 **New Perspectives on the Internet** James T.
