This Research Topic focuses on heritage languages at the crossroads by approaching heritage language bilingualism in an interdisciplinary way A language qualifies as a heritage language if it is a minority language spoken at home in a majority language context Any language can be the societal majority language in one context and the heritage language in another While the number of empirical studies on language acquisition and processing in heritage language bilingualism has increased in recent years heritage language bilinguals are an understudied subgroup of bilinguals When examined as adults heritage speaker bilinguals tend to show significant differences in their heritage language performance use and competence grammatical knowledge from one another This variation is particularly unusual because heritage speakers like monolinguals are native speakers of the heritage language The Routledge Handbook of Child and Family Social Work Research

Adoptees' Ethnic Identity Within Family and Social Contexts Ellen E. Pinderhughes, Rosa Rosnati, 2015-12-15 This special issue addresses the construction of ethnic identity among international transracial adoptees which typically involve the placement of Black Asian Hispanic or Multiracial children with White parents International transracial adoptees similar to immigrants navigate a cultural and ethnic context other than their birth culture However they are unique in that they navigate these experiences within families who don't share their cultural ethnic and racial background Critical questions emerge about the construction and development of their ethnic identity These questions include the role that transracial adoptive parents play in providing cultural socialization exposure to children's birth culture the impact of culture camps designed to provide cultural socialization in the context of peers the intersection of adoptive identity and ethnic identity and youth adjustment whether relations between ethnic identity and adjustment are linear or curvilinear the role of bicultural identity integration as a link between ethnic identity and psychosocial adjustment and ethnic identity processes among internationally transracially adopted young adults who mentor younger adoptees from similar cultures These questions are

addressed in this special issue in a collection of studies that examine ethnic identity among diverse international transracial adoptees at different ages adopted into two countries and using differing sample sizes and methodologies International transracial adoptive families represent a microcosm of the growing international transracial and transethnic social transactions taking place in this diverse world The collective findings in this special issue about the multidimensionality of ethnic identity and its intersectionality with other identities across developmental eras not only enhance knowledge about identity development among international transracial adoptees but also expand understanding about identity development in general This is the 150th volume in this Jossey Bass series New Directions for Child and Adolescent Development Its mission is to provide scientific and scholarly presentations on cutting edge issues and concepts in this subject area Each volume focuses on a specific new direction or research topic and is edited by experts from that field
