Stretching the Constitution Andrew Blick, 2019-03-21 How far did the European Union EU referendum result of 23 June 2016 really justify and necessitate the policies executed in response to it What are the implications of that vote and its prolonged aftermath for the United Kingdom UK constitution What other challenges does our political system face This book seeks to answer these questions It considers from a constitutional perspective the way in which the decision to leave the EU was taken and then implemented discussing in particular the role of Parliament as a legislature and political assembly It includes a close analysis of the referendum legislation and relevant parliamentary debates The author also considers the wider implications of Brexit for a system that has changed substantially in the period since the United Kingdom first joined the European Economic Community EEC in 1973 Taking into account the expansive implications of Brexit he considers a variety of aspects of the UK constitution including referendums Parliament devolution and the Union the Civil Service and the so called unwritten constitution from both an historic and contemporary perspective The book then assesses other issues that do not arise directly from Brexit but are likely to have implications for the operation of the system and have a global aspect to them They include political applications of the Internet and climate change Finally the author makes a series of proposals for constitutional and other reforms that will help the UK's democratic system to adapt to its changing environment

**Propaganda 2.1** Peter K. Fallon, 2022-09-08 Since the US presidential election of 2016 the words propaganda and fake news have been prominent in American political and cultural discourse Yet very few people can provide a coherent explanation of what they mean precisely when using them On the two sides of the political spectrum red and blue each points out messages from the other side that they think are untrue or that they simply don't like Unlike our dangerously biased political system however reality has more than only two sides For decades Americans sat by while their mediated world was carved into a single red reality focused in necessary opposition to a single blue reality We've been given red media outlets and blue media outlets to stoke our collective rage each against the other's lies But the first two decades of the twenty first century have presented us with a new information environment one of unregulated and seemingly uncontrollable information Like the young boy in a popular folktale we can now see if only we can resist the pressures of social conformity that both emperors red and blue strut proudly before us naked Propaganda 2.1 is a handbook for seeing reality clearly and coping with it

*The Dumbest Generation Grows Up* Mark Bauerlein, 2022-02-01 From Stupefied Youth to Dangerous Adults Back in 2008 Mark Bauerlein was a voice crying in the wilderness As experts greeted the new generation of Digital Natives with extravagant hopes for their high tech future he pegged them as the Dumbest Generation Today their future doesn't look so bright and their present is pretty grim The twenty somethings who spent their childhoods staring into a screen are lonely and purposeless unfulfilled at work and at home Many of them are even suicidal The Dumbest Generation Grows Up is an urgently needed update on the Millennials explaining their not so quiet desperation and more important the threat that their

ignorance poses to the rest of us Lacking skills knowledge religion and a cultural frame of reference Millennials are anxiously looking for something to fill the void Their mentors have failed them Unfortunately they have turned to politics to plug the hole in their souls Knowing nothing about history they are convinced that it is merely a catalogue of oppression inequality and hatred Why they wonder has the human race not ended all this injustice before now And from the depths of their ignorance rises the answer Because they are the first ones to care All that is needed is to tear down our inherited civilization and replace it with their utopian aspirations For a generation unacquainted with the constraints of human nature anything seems possible Having diagnosed the malady before most people realized the patient was sick Mark Bauerlein surveys the psychological and social wreckage and warns that we cannot afford to do this to another generation

### **The Future of the Professions**

**Richard Susskind,Daniel Susskind,2022-03-31** This book predicts the decline of today's professions and introduces the people and systems that will replace them In an internet enhanced society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction The authors challenge the grand bargain the arrangement that grants various monopolies to today's professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks With a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions Illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century
