Social Change Christopher Chase-Dunn, Bruce Lerro, 2016-01-08 From the Stone Age to the Internet Age this book tells the story of human sociocultural evolution. It describes the conditions under which hunter gatherers, horticulturalists, agricultural states and industrial capitalist societies formed, flourished and declined. Drawing evidence from archaeology, ethnography, linguistics, historical documents, statistics and survey research, the authors trace the growth of human societies and their complexity and they probe the conflicts in hierarchies both within and among societies. They also explain the macro-micro links that connect cultural evolution and history with the development of the individual self-thinking processes and perceptions. Key features of the text: Designed for undergraduate and graduate social science classes on social change and globalization topics in sociology, world history, cultural geography, anthropology and international studies. Describes the evolution of the modern capitalist world system since the fourteenth century BCE with coverage of the rise and fall of system leaders, the Dutch in the seventeenth century, the British in the nineteenth century and the United States in the twentieth century. Provides a framework for analyzing patterns of social change. Includes numerous tables, figures and illustrations throughout the text. Supplemented by framing part introductions, suggested readings at the end of each chapter, an end-of-text glossary and a comprehensive bibliography. Offers a web-based auxiliary chapter on Indigenous North American World Systems and a companion website with Excel data sets and additional web links for students.
