Turban, 2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level advanced undergraduate level textbook on the subject

Electronic commerce EC describes the manner in which transactions take place over electronic networks mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications such as buying and selling stocks and airline tickets online are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn, and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China, where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries, e.g., the shared economy models of Uber and Airbnb. The 2018 9th edition brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

**TIME Artificial Intelligence**  
The Editors of TIME, 2017-09-29. The future of humankind. Artificial intelligence has moved beyond science fiction and into reality, changing history and touching our lives in so many ways, from how astronomers explore the edges of our universe to whether your music system understands the difference between John Legend and John Lennon. Digital assistants such as Siri and Alexa, as well as the next generation of smartphones, genomic research, instant language translation, and self-driving cars, all incorporate artificial intelligence. In this new special edition from TIME Artificial Intelligence: The Future of Humankind, readers delve into this fascinating field with authoritative essays and infographics and compelling images of the machines, the science, and the people that are changing the course of the future. With a history of AI, a glossary of the terms that will soon become commonplace, a detailed Q&A, and focused articles on how AI is changing entertainment, education, technology, communication, and everything else, TIME Artificial Intelligence is your guide to the future.

**Your Home** Dominic Ogburn, Harvey Grennan, 2004. Answers all the questions people ask when they are buying, selling, building, or renovating a home or an investment property.

**Intelligent Computing and Communication** K. Srujan Raju, Roman Senkerik, T. Kishore Kumar, Mathini Sellathurai, Voruganti Naresh Kumar, 2025-03-28. This book features a collection of high-quality peer-reviewed papers presented at the Seventh International Conference on Intelligent Computing and Communication (ICICC 2024) organized by CMR Technical Campus CMRTC Hyderabad, Telangana, India, on August 30-31, 2024. It focuses on innovation paradigms in system knowledge, intelligence, and sustainability that can be applied to provide practical solutions to several problems in society, the environment, and industry. Further, the book also addresses the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in various disciplines of science, technology, and health care.

*Artificial Intelligence Technologies and Applications* Chenglizhao Chen, 2024-02-15. Artificial Intelligence (AI) is

rapidly becoming an inescapable part of modern life and the fact that AI technologies and applications will inevitably bring about significant changes in many industries and economies worldwide means that this field of research is currently attracting great interest This book presents the proceedings of ICAITA 2023 the 5th International Conference on Artificial Intelligence Technologies and Applications held as a hybrid event from 30 June to 2 July 2023 in Changchun China The conference provided an international forum for academic communication between experts and scholars in the field of AI promoting the interchange of scientific information between participants and establishing connections which may lead to collaboration research and development activities in related fields The 126 papers included here were selected following a thorough review process and are divided into 4 sections covering AI simulation and mechatronics intelligent network architecture and system monitoring intelligent algorithm modeling and numerical analysis and intelligent graph recognition and information processing Topics addressed include artificial neural networks computational theories of learning intelligent system architectures pervasive computing and ambient intelligence and fuzzy logic and methods Covering a wide range of topics and applications current in AI research the book will be of interest to all those working in the field
