**The Dynamics of Plug-in Electric Vehicles in the Secondary Market and Their Implications for Vehicle Demand, Durability, and Emissions** Thomas Turrentine, Gil Tal, David Rapson, 2018

Ludicrous Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have

become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry. But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects. While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money. And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans. In *Ludicrous* journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces. Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight.

**The Market Impact of Standardized Design in Commercial PEV Battery Pack Purchase and Disposal** James Paul, Electricore, Inc, 2015      Impact of digital transformation on business models in the automotive industry Robin Mayer, 2023-06-12 Master's Thesis from the year 2023 in the subject Engineering Automotive Engineering grade 1 5 University of Applied Sciences Aalen language English abstract Digital transformation and disruptive business models of new market players create unprecedented uncertainty in the automotive industry. One of the main reasons is the lack of understanding for the need of adapting business models to a changing business environment due to new technologies and shifting customer wants and needs. Even the automotive industry is not spared from digital Darwinism according to which it is not the strongest or most intelligent of a species that survives but rather the one that adapts best to change. What opportunities do OEMs have to transform their business models? How can best practices be used to generate new value creation and what influence does the transformation of the business model have on the ecosystem? What role will the dealer play in the future and how can he still deliver added value to the OEM? This paper provides an in depth insight into the world of automotive sales as well as a detailed analysis of the status quo. Best practices based on successful business model transformations of the top tier OEMs are the basis for a deeper understanding and serve other companies as foundation for developing digital business models. The goal of this paper is to examine the impact of digital transformation on the dealer business model and how they can continue to deliver value to the OEM. For this purpose guided expert interviews are conducted with 16 experts from various areas of the automotive industry. Subsequently a qualitative content analysis according to Mayring will be used to assess the challenges and impacts of the agent business model and to develop improvement measures and key topics that offer added value for OEMs. The results of this thesis support dealers in

understanding their future role in the automotive industry and show design recommendations for a future proof business model
