## COMPARE & CONTRAST

Directions: Read both sections below. Compare and contrast the two animals.

### DOLPHINS

A dolphin is a warm-blooded mammal that lives in the ocean. Dolphins give birth to babies that are called calves. They also breathe oxygen. A dolphin must live near the surface where it can breathe air. Dolphins are known to be vocal and social animals. They swim in pods where they come together with their mates to travel. Dolphins have a dorsal fin on their back, two fins on their side, and a tail. They also have a blowhole on top of their body. Their tail is horizontal and is used to swim in an up-and-down motion. A dolphin will eat things like fish, crustaceans, squid and shrimp.

### SHARKS

Sharks are cold-blooded fish that live in the ocean. They spend their whole lives deep underwater. Like other fish, sharks have gills to remove oxygen from the environment. Sharks prefer to live and hunt alone. They do not like to socialize with other sharks. Sharks have a dorsal fin on their back, two fins on their side, and a tail. They also have gills on the side of their body. Their tail is vertical and is used to swim in a side-to-side motion. A shark will eat things like fish, crustaceans, squid, shrimp, other sharks, marine mammals, and plankton.

Reading Sounds Sean Zdenek,2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue as one might assume at first but consists largely of making rhetorical choices For Sean Zdenek when captioners describe a sound they are interpreting and creating contexts they are assigning significance they are creating meaning that doesn't necessarily exist in the soundtrack or the script And in nine chapters he analyzes the numerous complex rhetorical choices captioners make from abbreviating dialogue so it will fit on the screen and keep pace with the editing to whether and how to describe background sounds accents or slurred speech to nonlinguistic forms of sound communication such as sighing screaming or laughing to describing music captioned silences as when a continuous noise suddenly stops and sarcasm surprise and other forms of meaning associated with vocal tone Throughout he also looks at closed captioning style manuals and draws on interviews with professional captioners and hearing impaired viewers Threading through all this is the novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning thereby better serve the needs of hearing impaired viewers The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the Internet where captioning can take on additional functions such as enhancing searchability While scholarly work has been done on captioning from a legal perspective from a historical perspective and from a technical perspective no one has ever done what Zdenek does here and the original analytical models he offers are richly interdisciplinary drawing on work from the fields of technical communication rhetoric media studies and disability studies
