Meme Media and Meme Market Architectures Yuzuru Tanaka, 2003-07-10 This book provides an integrated view of the five kinds of enabling technologies in terms of knowledge media architectures multimedia and hypermedia object oriented GUI and visual programming reusable component software and component integration network publishing and electronic commerce and object oriented and multimedia databases Among many books on multimedia and hypermedia few address knowledge Of those that do none focus on media for the editing distribution and management of knowledge the way this book does It is written based on the hypothesis that knowledge media work as genes with their network publishing repository working as a gene pool to accelerate the evolution of knowledge shared in our societies *Emotional Labor in the 21st Century* Alicia Grandey, James Diefendorff, Deborah E. Rupp, 2013-05-07 This book reviews integrates and synthesizes research on emotional labor and emotion regulation conducted over the past 30 years The concept of emotional labor was first proposed by Dr Arlie Russell Hochschild 1983 who defined it as the management of feeling to create a publicly observable facial and bodily display p 7 for a wage A basic assumption of emotional labor theory is that many jobs e g customer service healthcare team based work management have interpersonal and thus emotional requirements and that well being and effectiveness in these jobs is determined in part by a person s ability to meet these requirements Since Hochschild s initial work psychologists sociologists and management scholars have developed distinct theoretical approaches aimed at expanding and elaborating upon Hochschild s core ideas Broadly speaking emotional labor is the study of how emotion regulation of oneself and others influences social dynamics at work which has implications for performance and well being in a wide range of occupations and organizational contexts This book offers researchers and practitioners a review of emotional labor theory and research that integrates the various perspectives into a coherent framework and proposes an agenda for future research on this increasingly relevant and important topic The book is divided into 5 main sections with the first section introducing and defining emotional labor as well as creating a framework for the rest of the book to follow The second section consists of chapters describing emotional labor theory at different levels of analysis including the event person dyad and group The third section illustrates the diversity of emotional labor in distinct occupational contexts customer service e g restaurant retail call centers and caring work The fourth section considers broader contextual influences organizational societal and cultural level factors that modify how and when emotional labor is done The final section presents a series of reflective essays from eminent scholars in the area of emotion and emotion regulation where they reflect upon the past present and future of emotion regulation at work **The Neurophysics of Human Behavior** Mark E. theory of Research and Teaching in a Pandemic World Basil Cahusac de Caux,Lynette Pretorius,Luke Macaulay,2023-01-01 This book adopts collaborative autoethnography as its methodology and presents the collective witnessing of experiences of the COVID 19 pandemic within the higher education sector Through the presentation of staff and student experiences and what was learnt from them the authors examine the global phenomenon that is the COVID 19 pandemic through the purposeful exploration of their own experiences This book presents an overall argument about the state of higher education in the middle of the pandemic and highlights academic issues and region specific challenges The reflections presented in this book offer insights for other staff and students as well as academic policy makers regarding the pandemic experiences of those within academia It also offers practical suggestions as to how we as a global community can move forward post pandemic Asian Sources Electronic Components ,2004 The Information Security Dictionary Urs E. Gattiker,2006-04-18 Something for Everyone If this book is to succeed and help readers its cardinal virtue must be to provide a simple reference text It should be an essential addition to an information security library As such it should also serve the purpose of being a quick refresher for terms the reader has not seen since the days when one attended a computing science program information security course or workshop As a reference work THE INFORMATION SECURITY DICTIONARY provides a relatively complete and easy to read explanation of common security malware vulnerability and infrastructure protection terms without causing much damage to the usually slim student pocketbook This dictionary can help non specialistreaders better understand the information security issues encountered in their work or studying for their certification examination or whilst doing a practical assignment as part of a workshop This book is also essential to a reference collection for an organization s system personnel Special attention is paid to terms which most often prevent educated readers from understanding journal articles and books in cryptology computing science and information systems in addition to applied fields that build on those disciplines such as system design security auditing vulnerability testing and role based access management The dictionary provides definitions that enable readers to get through a difficult article or passage We do not for the most part directly explain how to conduct research or how to implement the terms briefly described Microwave Journal ,2003 **Searcher** ,1998 **The Face Mask In COVID Times** Deborah Lupton,Clare Southerton,Marianne Clark,Ash Watson,2021-04-19 The simple fabric face mask is a key agent in the fight against the global spread of COVID 19 However beyond its role as a protective covering against coronavirus infection the face mask is the bearer of powerful symbolic and political power and arouses intense emotions Adopting an international perspective informed by social theory The Face Mask in COVID Times A Sociomaterial Analysis offers an intriguing and original investigation of the social cultural and historical dimensions of face masking as a practice in the age of COVID Rather than Beck s risk society we are now living in a COVID society the long term effects of which have yet to be experienced or imagined Everything has changed The COVID crisis has generated novel forms of sociality and new ways of living and moving through space and time In this new

world the face mask has become a significant object positioned as one of the key ways people can protect themselves and others from infection with the coronavirus The face mask is rich with symbolic meaning as well as practical value In the words of theorist Jane Bennett the face mask has acquired a new thing power as it is coming together with human bodies in these times of uncertainty illness and death The role of the face mask in COVID times has been the subject of debate and dissension arousing strong feelings The historical and cultural contexts in which face masks against COVID contagion are worn or not worn are important to consider In some countries such as Japan and other East Asian nations face mask wearing has a long tradition Full or partial facial coverings such as veiling is common practice in regions such as the Middle East In many other countries including most countries in the Global North most people beyond health care workers have little or no experience of face masks They have had to learn how to make sense of face masking as a protective practice and how to incorporate face masks into their everyday practices and routines Face masking practices have become highly political The USA has witnessed protests against face mask wearing that rest on sovereign individualism a notion which is highly specific to the contemporary political climate in that country Face masks have also been worn to make political statements bearing anti racist statements for example but also Trump campaign support Meanwhile celebrities and influencers have sought to advocate for face mask wearing as part of their branding while art makers museums designers and novelty fashion manufacturers have identified the opportunity to profit from this sudden new market Face masks have become a fashion item as well as a medical device both a way of signifying the wearer s individuality and beliefs and their ethical stance in relation to the need to protect their own and others health The Face Mask in COVID Times A Sociomaterial Analysis provides a short and accessible analysis of the sociomaterial dimensions of the face mask in the age of COVID 19 The book presents seven short chapters and an epilogue We bring together sociomaterial theoretical perspectives with compelling examples from public health advice and campaigns anti mask activism as well as popular culture news reports blog posts videos online shopping sites art works to illustrate our theoretical points and use Images to support our analysis
