1. **Newton's Laws of Motion**

- Newton's First Law of Motion: An object at rest stays at rest and an object in motion stays in motion with the same speed and in the same direction unless acted upon by an unbalanced force.
- Newton's Second Law of Motion: The acceleration of an object depends on two variables: the net force acting upon the object and the mass of the object.
- Newton's Third Law of Motion: For every action, there is an equal and opposite reaction.

**Friction**

- Friction is a force that opposes motion between two surfaces in contact.
- Friction is proportional to the normal force between the surfaces.
- Friction is a non-conservative force, meaning it does work on an object.
