*Diminishing Returns* Lucio Baccaro, Mark Blyth, Jonas Pontusson, 2022 A set of state of the art empirical analyses at the country regional and global level that work from a new theoretical framework that analyzes the politics of growth and stagnation. As highlighted by the recent debate on secular stagnation economic growth has slowed down considerably and this has given rise to a host of new problems from financial instability to the collapse of mainstream parties. What happens when growth the main mechanism of capitalist legitimization is harder to come by and less broadly shared. And how should we think about capitalist diversity in the context of global stagnation. In *Diminishing Returns* Lucio Baccaro, Mark Blyth and Jonas Pontusson address these questions by bringing together a number of comparative and international political economists with expertise across many different countries and regions. Going beyond the methodological nationalism common in most comparative research each author departs from a common theoretical framework the Growth Model Perspective and contributes to develop it further. The outcome is a new theoretical framework to help social scientists, policymakers and opinion makers understand the politics of growth and stagnation which offers state of the art empirical analyses at the country regional and global level.

*Road to Nowhere* Paris Marx, 2022-07-05 Elon Musk and the masters of Silicon Valley want us to believe technology can revolutionize our cities and means of transport. *Road to Nowhere* exposes the paucity of their vision a distracting fantasy that will only delay the collective solutions already known to be effective. Technological responses to social problems and the people behind these barren ideas must be challenged if our cities and transportation systems are to serve the public good. Paris Marx offers a plan for an innovative transportation system to meet the needs of the poor the marginalized and the vulnerable as well as those of everybody else. *Road to Nowhere* argues that rethinking transport could be the first step in a broader reimagining of our social economic and political systems which ought to be structured around the many not the few.

**Army-Navy-Air Force Register and Defense Times**, 1914 **The Business Year: Mexico 2024**, 2024-02-23 To understand how the investment environment has evolved over recent months in Mexico our team conducted a year long on the ground research operation that included interviews with over 150 business leaders and officials defining trends across every major sector of the economy. It is an election year in Mexico meaning the often turbulent Obrador administration is drawing to a close. In contrast with the nervousness and uncertainty we witnessed ahead of his inauguration our team notes a particular sense of ease around the upcoming elections as CEOs and investors are more familiarized with Morena the party founded by the incumbent president. Overall 2024 is expected to see an unusual general continuity of business during an election year thanks to the fact that both of the main presidential candidates are not

expected to announce disruptive macroeconomic policies Through this 220 page publication featuring interviews with top business leaders from every major sector of the economy as well as a range of articles and analysis we present a comprehensive snapshot of the Mexican economy and the investment environment at this crucial period CIS Index to U.S. Executive Branch Documents, 1910-1932: Civil Service Commission.
