Press Play Bastian Bergmann, 2025-09-09 An eye opening look at the rapidly rising growth of gaming and the companies including Peloton, Burberry, the New York Times, BMW, and Chipotle that are using games to win over customers. Today's consumers demand more than products; they crave immersive, personalized experiences. As a result, traditional marketing and engagement strategies have lost their edge. The new frontier: Gaming, where over three billion people worldwide spend their time, attention, and money. In *Press Play*, Bastian Bergmann, cofounder and COO of Solsten, shows how visionary companies are capitalizing on gaming's unstoppable rise. Drawing on exclusive interviews and access to forward-thinking companies ranging from Adidas and Puma to NASCAR and Unilever, Bergmann provides an insider's view of gaming's transformative power. He also delivers a practical road map for business leaders, offering strategies that range from low-risk partnerships to ambitious full-scale gaming ventures. Filled with cutting-edge insights and behind-the-scenes stories of iconic organizations and groundbreaking startups, *Press Play* will help you understand the lucrative world of video games and enable you to offer your customers what they really crave.

The Race of Sound Nina Sun Eidsheim, 2019-01-11 Examining singers Marian Anderson, Billie Holiday, and Jimmy Scott, as well as vocal synthesis technology, Nina Sun Eidsheim traces the ways in which the voice and its qualities are socially produced and how listeners assign a series of racialized and gendered set of assumptions to a singing voice.

Impact Keith V. Lucas, 2025-08-19 Impact explores the people and culture teams need for sustained innovation and problem solving. This transformative guide is aimed at leaders who have earned their roles through subject matter expertise, a capacity for impact, and innate leadership skills, and who now face the challenge of building innovative teams. This is the high impact engineer turned manager, or the rising scientist turned lab director, or the founding startup executive. Subject matter proficiency and leadership intuition can initially take leaders far, but team performance ultimately hits a wall when leaders lack team building expertise. Impact guides individuals across the leadership spectrum from the new player coach to the seasoned team builder, helping them sidestep common scaling pitfalls such as diminished team impact, lower productivity, culture dilution, disempowerment, and loss of focus. It presents a two-tiered framework that examines culture as a system and leadership as a discipline. The first tier offers team-wide practices to drive focus, cultivate alignment, and unlock collective brainpower and horsepower. The second tier provides individual-centered practices to ensure the team hires, promotes, and retains those most likely to contribute to the mission. Drawing from Keith V. Lucas's direct experience in building teams and advising startups, Impact offers practical insights for effective team building and leadership.

Metaverse Communication Prasanna Bhattathiri, 2025-01-03
Metaverse Communication: Redefining Connections delves into the transformative potential of the Metaverse. This book explores whether the Metaverse can truly become a space for life changing experiences and interactions surpassing the current Internet. We define the Metaverse as a shared 3D virtual space that combines elements of the digital and physical worlds. This book examines whether technology can overcome infrastructure challenges, corporate greed and physical limitations to create a continuously shared virtual universe. We highlight key industry insights such as Facebook's rebranding to Meta and its significant investment in the Metaverse. With predictions like Bloomberg's estimate of an 800 billion Metaverse market by 2024, the book discusses the enormous economic and social potential of this new frontier.

Artificial Intelligence and International Arbitration Law Magdalena Łągiewska, 2025-11-21
The book asks whether the use of Artificial Intelligence (AI) and Generative AI (GenAI) in international arbitration represents a revolution or an evolution of the international dispute resolution landscape. Critically engaging with the transformative impact of the Fourth Industrial Revolution (4IR), this book focuses on the integration of AI and GenAI into international commercial arbitration. Set against the backdrop of rapid technological advancement, it explores how arbitral tribunals and stakeholders are cautiously yet progressively adopting these innovations in a manner that respects and preserves the foundational principles of arbitration. Through an interdisciplinary and practice oriented approach, the book examines the evolving role of AI in arbitration. It analyzes how AI is perceived and applied by parties, arbitral institutions, and arbitrators, as well as assesses the legal frameworks in place to govern it. Offering a balanced analysis of both the opportunities and legal and ethical dilemmas posed by emerging technologies, the book asks if a duty of disclosure is relevant in relation to AI use and what challenges this might entail. It also covers the status of AI generated arbitral awards under international law as well as copyright law. This book will be of interest to researchers in the field of international arbitration and commercial law.

Privacy in the Age of Big Data Theresa Payton, Ted Claypoole, 2023-03-15 A thorough update to a classic in the field of privacy and big data. We have a global privacy problem. The average person provides more information about themselves to more outsiders than any time in history. Corporations, governments, and even our neighbors can know where we are at times, can quickly learn our preferences and priorities, and see who we meet. The past decade has brought deep changes in the collection of our private information, the regulation of that collection, and in people's sensitivity to loss of privacy. The nascent privacy threatening technology trends of a decade ago have blossomed into relentless data capturing systems that police and companies have come to rely on. To address the expansion of personal data capture, entire data regulatory regimes have arisen throughout the world with new regulations added each year. People are more concerned, regulators are more aggressive, yet data collection continues to increase with consequences around the world. Social media use has fragmented in the past five years, spreading personal information over dozens of platforms. Even most of our new televisions have started collecting second by second information about our households recently and some of those televisions can recognize the individuals watching and the devices they carry. Amazon just activated a new worldwide network using bandwidth from personal wifi of Echo devices and Ring security systems. The beat of new intrusions never seems to end. These data trends are relentless and yet response to the pandemic accelerated them. Rapid development of contactless everything became the norm. Contact tracing apps became acceptable, QR codes for everything from menus to contact information were created quickly. Businesses are faced with hybrid in office and remote workforces. More people are dependent on online and mobile technologies for food, medicine, and even human connection. And each of these contacts can be captured somewhere and logged in a file for marketing or surveillance. People want to keep their lives private but they don't.

t know how The second edition of Privacy in the Age of Big Data addresses the significant advances in data driven technology their intrusion deeper in our lives the limits on data collection newly required by governments in North America and Europe and the new security challenges of world rife with ransomware and hacking This thoroughly updated edition demonstrates personal privacy vulnerabilities and shows ways to live a safer more private life Other privacy books tend to focus deeply on the evils of large tech companies or more academic and technical concerns But Privacy in the Age of Big Data second edition helps regular people understand the privacy threats and vulnerabilities in their daily lives and will provide solutions for maintaining better privacy while enjoying a modern life Unlike other books this one shows what you can do to make a difference to understand your current digital footprint and what you need to do to claw back your privacy and secure it in the future While PRIVACY IN THE AGE OF BIG DATA will have cross sectional appeal to many demographics working adults 25 60 and CEOs and Boards of businesses are the primary demographic young enough to know we need to do something to protect privacy and old enough to remember what happens when we haven t in the past With down to earth prose and examples pulled from daily life the writing style will attract buyers of all education levels **Punch** ,1875 **Microsoft**
