Pdf Advances Social Computing Multiagent Systems:

Advances in Social Computing and Multiagent Systems Fernando Koch, Christian Guttman, Didac Busquets, 2015-11-14 This book constitutes thoroughly revised selected papers of the proceedings of the 6th International Workshop on Collaborative Agents Research and Development CARE 2015 and the Second International Workshop on Multiagent Foundations of Social Computing MFSC 2015 held in Istanbul Turkey on May 4 2015 Both Workshops were held in conjunction with AAMAS 2015 The 5 revised full papers of CARE and the 7 full papers of MFSC presented were carefully selected from 14 CARE and 10 MFSC submissions Both workshop address issues in relevant areas of social computing such as smart societies social applications urban intelligence intelligent mobile services models of teamwork and collaboration

Advanced Methods and Technologies for Agent and Multi-Agent Systems D. Barbucha, M.T. Le, R.J. Howlett, 2013-05-14 The field of agent and multi agent systems is concerned with the development and evaluation of sophisticated AI based problem solving and control architectures for both single and multi agent systems This book presents the proceedings of the 7th KES Conference on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2013 held in Hue City Vietnam in May 2013 The KES AMSTA 2013 conference provides an internationally respected forum for scientific research in the technologies and applications of agent and multi agent systems In all 44 papers were selected for oral presentation and publication in this volume Special attention is paid to the feature topics of intelligent technologies and applications in the area of e health social networking self organizing systems economics and trust management Other topics covered include agent oriented software engineering beliefs engineering desires and intentions representation agent cooperation coordination negotiation organization and communication distributed problem solving specification of agent communication languages formalization of ontologies and conversational agents The book highlights new trends and challenges in agent and multi agent research and will be of interest to the research community working in the fields of artificial intelligence collective computational intelligence robotics dialogue systems and in particular agent and multi agent systems technologies and applications

Digital Enlightenment Yearbook 2014 K. O'Hara, M-H.C. Nguyen, P. Haynes, 2014-11-21 Tracking the evolution of digital technology is no easy task changes happen so fast that keeping pace presents quite a challenge This is nevertheless the aim of the Digital Enlightenment Yearbook This book is the third in the series which began in 2012 under the auspices of the Digital Enlightenment Forum This year the focus is on the relationship of individuals with their networks and explores Social networks and social machines surveillance and empowerment In what is now the well established tradition of the yearbook different stakeholders in society and various disciplinary communities technology law philosophy sociology economics policymaking bring their very different opinions and perspectives to bear on this topic The book is divided into four parts the individual as data manager the individual society and the market big data and open data and new approaches These are bookended by a Prologue and an Epilogue which provide illuminating perspectives on the discussions

in between The division of the book is not definitive it suggests one narrative but others are clearly possible The 2014 Digital Enlightenment Yearbook gathers together the science social science law and politics of the digital environment in order to help us reformulate and address the timely and pressing questions which this new environment raises We are all of us affected by digital technology and the subjects covered here are consequently of importance to us all Advances in Robotics and Automatic Control: Reviews, Vol. 1 Sergey Yurish, 2018-07-22 The first volume of the Advances in Robotics and Automatic Control Reviews Book Series started by IFSA Publishing in 2018 contains ten chapters written by 32 contributors from 9 countries Belgium China Germany India Ireland Japan Serbia Tunisia and USA We hope that readers will enjoy this book and it can be a valuable tool for those who involved in research and development of various robots and automatic control systems *AIxIA 2021 – Advances in Artificial Intelligence* Stefania Bandini, Francesca Gasparini, Viviana Mascardi, Matteo Palmonari, Giuseppe Vizzari, 2022-07-18 This book constitutes revised selected papers from the refereed proceedings of the 20th International Conference of the Italian Association for Artificial Intelligence AIxIA 2021 which was held virtually in December 2021 The 36 full papers included in this book were carefully reviewed and selected from 58 submissions the volume also contains 12 extended and revised workshop contributions The papers were organized in topical sections as follows Planning and strategies constraints argumentation and logic programming knowledge representation reasoning and learning natural language processing AI for content and social media analysis signal processing images videos and speech machine learning for argumentation explanation and exploration machine learning and applications and AI applications **Spatial-temporal Metrics to Assess Collective Behavior in Team Sports** Yixiong Cui, Antonio García-de-Alcaraz Serrano , Tianbiao Liu, 2026-01-07 Team sports performance functions as a complex system and players from different positions exhibit a tendency to form team synergies into coordinated patterns contingent upon task orientation whether in the attacking or defensive phases This inherent organizational process manifests self organizing nonlinear and dynamic characteristics In a traditional way match performance analysis has mainly focused on event data with frequency tables and sequential systems Such isolated single dimensional and descriptive analysis of high level football performance provides limited information about what actually constitutes individual behaviors and teams collective performance and will inevitably hinder practitioners in applying the scientific findings The evolution of sports performance analysis has closely paralleled advancements in modern technologies The integration of electronic performance complex system in team sports performance analysis social network analysis in team sports collaborative behavior in team sports spatial dynamics and patterns of team sports performance team formation and tactical behaviors pitch network theory and application pitch control theory and application *Behavior Engineering and Applications* Raymond Wong, Chi-Hung Chi, Patrick C. K. Hung, 2018-07-10 Many industrial applications built today are increasingly using emerging behavior engineering technologies this book looks at various research and practical issues for researchers and students working in computer science and

engineering and for industry technology providers interested in behavior engineering and applications Behavior Engineering and Applications encompasses intelligent and efficient computational solutions including models architectures algorithms and specific applications focused on processing discovering understanding and analyzing the behavior captured by the above data Focusing on applying any engineering paradigm to systemically process discover understand and analyze these data this book also addresses problems in a variety of areas and applications that related to behavior engineering This book includes chapters derived from selected papers from The 2016 International Conference on Behavior Engineering ICBE as well as separate contributions the editors selected cutting edge research related to behavior engineering

Generative AI in Education Ilaria Torre, Diego Zapata-Rivera, Chien-Sing Lee, Antonio Sarasa-Cabezuelo, Ioana Ghergulescu, Paul Libbrecht, 2024-12-24 In the field of education there is a growing interest in the use of Generative Artificial Intelligence to reshape the educational landscape Led by our esteemed Associate Editors Dr Zapata Rivera Prof Torre and Review Editors Profs Lee Sarasa Cabezuelo Libbrecht Dr Ghergulescu this editorial initiative aims to investigate the transformative potential of Generative AI in various aspects of education By leveraging machine learning models these intelligent systems extract useful insights from vast amounts of data making them capable of delivering highly individualized content They can analyze a learner s proficiency level learning style and pace and then tailor the study material accordingly Whether a learner prefers visual aids textual content or interactive modules Generative AI can adapt its content generation strategies to meet distinct preferences and learners needs This ensures an elevated engagement level and enhanced comprehension highlighting its potential to transform traditional teaching methodologies

Advances in Intelligent and Autonomous Aerospace Systems John Valasek, 2012 Research advances in embedded computational intelligence communication control and new mechanisms for sensing actuation and adaptation hold the promise to transform aerospace The result will be air and space vehicles propulsion systems exploration systems and vehicle management systems that respond more quickly provide large scale distributed coordination work in dangerous or inaccessible environments and augment human capabilities Advances in Intelligent and Autonomous Aerospace Systems seeks to provide both the aerospace researcher and the practicing aerospace engineer with an exposition on the latest innovative methods and approaches that focus on intelligent and autonomous aerospace systems The chapters are written by leading researchers in this field and include ideas directions and recent results on intelligent aerospace research issues with a focus on dynamics and control systems engineering and aerospace design The content on uncertainties modeling of large and highly non linear complex systems robustness and adaptivity is intended to be useful in both the sub system and the overall system level design and analysis of various aerospace vehicles A broad spectrum of methods and approaches are presented including Bio Inspiration Fuzzy Logic Genetic Algorithms Q Learning Markov Decision Processes Approximate Dynamic Programming Artificial Neural Networks Probabilistic Maps Multi Agent Systems Kalman particle and confidence filtering
