Communication Systems Engineering with GNU Radio Jean-Michel Friedt, Herve Boeglen, 2024-12-05 An approachable guide to an invaluable radiofrequency communication toolkit Software defined radio SDR which emerged in the 1990s has become a core development method in certain high profile fields including military and space communications High cost and problems with hardware availability however prevented this technology from being widely disseminated The advent of low cost hardware beginning in the 2010s however has made GNU Radio the leading open source software toolkit for developing SDR systems an increasingly viable and even critical tool for a new generation of radiofrequency communication engineers Communication Systems Engineering with GNU Radio provides an accessible overview of this toolkit and its applications Beginning with the fundamentals of using GNU radio for digital signal processing the volume then moves to the practicalities of decoding data and the advantages of accessing raw data normally unavailable in hardware defined radiofrequency receivers The result is a potentially crucial tool for engineers looking to adopt this cost effective and flexible standard for transmitting and processing radiofrequency signals Readers will also find A careful balance of radio communications theory with GNU Radio practicalities Practical implementation examples employing well developed open source GNU Radio platforms Extensive accompanying documentation and explanation Communication Systems Engineering with GNU Radio is ideal for graduate and undergraduate students in communications systems courses as well as professionals working in SDR

Requirements Engineering: Laying a Firm Foundation James A. Crowder, Curtis W. Hoff, 2022-01-03 This textbook lays the foundations for System of Systems Requirements Engineering and Requirements Management practices principles technique and processes It provides a comprehensive treatment of requirements engineering an integral part of Multidisciplinary Systems Engineering The book takes the student reader through the entire process of documenting analyzing tracing prioritizing and managing requirements and then goes on to describe controlling and communicating requirement change throughout the system development lifecycle The authors discuss the role of requirements management in support of other requirements engineering processes describe the principal requirements engineering activities and their relationships introduces techniques for requirements elicitation and analysis and describes requirements validation and the role of requirements reviews and discusses the role of requirements management in support of other requirements engineering processes A full suite of classroom material is provided including exercises assignments and PowerPoint slides

Designing and Implementing Interdisciplinary Education Zehui Zhan, Siyuan Lyu, Shijing Niu, Kai Tu, Qingna Lai, 2025-02-11 Interdisciplinary education is the future trend in global K 12 curriculum reform and all K 12 subject teachers should be prepared to meet the challenges it presents This book aims to explore the competence structure that K 12 teachers need to effectively design and implement interdisciplinary education from a general perspective of subject integration Drawing on relevant theories from interdisciplinary education and teacher competence research the book

clarifies the fundamental connotations of teachers interdisciplinary teaching competence and identifies the key elements of this competence from an international perspective It also examines the transformation pathways for teachers from subject specific teaching to interdisciplinary teaching based on China s national curriculum framework On this basis the book constructs a framework for K 12 teachers interdisciplinary teaching competence and applies it to the cultivation of interdisciplinary teaching staff guiding the design of assessment tools improvement strategies and training programs for enhancing interdisciplinary teaching competence The book will encourage teachers from different disciplines to participate in the design and implementation of interdisciplinary teaching thereby promoting the sustainable development of interdisciplinary education Global educators and researchers interested in interdisciplinary education competence framework development teacher professional development and Chinese education will find valuable insights in this book

International and Interdisciplinary Studies in Green Computing Ganesh, K.,Anbuudayasankar, S. P.,2012-12-31 With the growing awareness and popularity of environmental preservation research on green computing has gained recognition around the world Information technology must adopt initiatives in making computers as energy efficient as possible as well as design algorithms and systems for efficiency related computer technologies International and Interdisciplinary Studies in Green Computing provides coverage on strategic green issues and practices for competitive advantages and cost cutting in modern organizations and business sectors in order to reach environmental goals **The Routledge Companion to Artificial Intelligence in Architecture** Imdat As,Prithwish Basu,2021-05-05 Providing the most comprehensive source available this book surveys the state of the art in artificial intelligence AI as it relates to architecture This book is organized in four parts theoretical foundations tools and techniques AI in research and AI in architectural practice It provides a framework for the issues surrounding AI and offers a variety of perspectives It contains 24 consistently illustrated contributions examining seminal work on AI from around the world including the United States Europe and Asia It articulates current theoretical and practical methods offers critical views on tools and techniques and suggests future directions for meaningful uses of AI technology Architects and educators who are concerned with the advent of AI and its ramifications for the design industry will find this book an essential reference **Guide to the Software Engineering Body of Knowledge** Alain Abran,James W. Moore,2004 The purpose of the Guide to the Software Engineering Body of Knowledge is to provide a validated classification of the bounds of the software engineering discipline and topical access that will support this discipline The Body of Knowledge is subdivided into ten software engineering Knowledge Areas KA that differentiate among the various important concepts allowing readers to find their way quickly to subjects of interest Upon finding a subject readers are referred to key papers or book chapters Emphases on engineering practice lead the Guide toward a strong relationship with the normative literature The normative literature is validated by consensus formed among practitioners and is concentrated in standards and related documents The two major standards bodies for software

engineering IEEE Computer Society Software and Systems Engineering Standards Committee and ISO IEC JTC1 SC7 are represented in the project

Handbook on Digital Twin and Artificial Intelligence Techniques for Rail Applications Maksym Spiryagin, Stefano Bruni, Colin Cole, 2025-06-17 With contributions from experts from around the world this handbook aims to systemize the existing experience and knowledge that can be used to the development of more efficient and controlled railway systems As a result this handbook showcases the modern methods methodologies and frameworks for the development of DT and AI architectures and apparatus in the area of the existing railway systems and transport engineering tasks The chapters cover such varied and specialized topics as the processes related to the transformation of a physical twin into a digital twin the application of data driven and physics based simulation approaches in the development of digital twins asset management application tasks with the implementation of DT and AI and the experimental and field applications of the DT and AI concepts and technologies in railway transport system design and predictive maintenance tasks Handbook on Digital Twin and Artificial Intelligence Techniques for Rail Applications is essential reading for engineers practitioners and researchers involved in the development of railway transport and transit systems

Cities' Identity Through Architecture and Arts Anna Catalani, Zeinab Nour, Antonella Versaci, Dean Hawkes, Hocine Bougdah, Adolf Sotoca, Mahmoud Ghoneem, Ferdinando Trapani, 2018-05-01 Every city has its unique and valuable identity this identity is revealed through its physical and visual form it is seen through the eyes of its residents and users The city develops over time and its identity evolves with it Reflecting the rapid and constant changes the city is subjected to Architecture and Arts is the embodiment of the cultural historical and economical characteristics of the city This conference was dedicated to the investigation of the different new approaches developed in Architecture and Contemporary arts It has focused on the basis of urban life and identities This volume provides discussions on the examples and tendencies in dealing with urban identities as well as the transformation of cities and urban cultures mentioned in terms of their form identity and their current art Contemporary art when subjected to experiments continues to be produced in various directions to be consumed and to put forward new ideas Art continuously renews itself from new materials to different means of communication from interactive works to computer games from new approaches to perceptual paradigms and problems of city and nature of the millennium This is an Open Access ebook and can be found on www.taylorfrancis.com
