

Mooney Problem Checklist

Author and year

The Mooney problem checklist was developed by Ross L Mooney and Leonard V Gordon in 1950.

Introduction

Mooney Problems Checklist helps adolescents and adults to express personal problems and is also useful for increasing teacher understanding of students and for preparing students for counseling interviews. It helps to identify and discuss their problems related to educational settings.

Four forms of checklist were published for different age range. Its target population is adults, college, high school and junior high school. It helps adolescents and adults to express personal problems and it is useful for increasing teacher understanding of students and for preparing students for Counseling interviews.

Mooney problem checklist is an effective way to identify problems that are hindering the learning process of students. This checklist makes individuals think about their educational problems in a deeper way. This checklist is a form of simple communication between student and counselor.

Objectives

- **Express personal problems:** Mooney problem checklist helps students to express their personal problems. Means they are free to express their all problems concerning school, health, education, homework, classroom conflicts. Students first identify and underline problems and discuss them. This enables students to solve their problems.
- **Stressed for exams:** As we know all students worry for their upcoming exams. These students also face problems regarding the preparation of exams. Some are confused and some feel anxiety. And some are worried about their marks. And some are pressurized by their parents to get top positions. And some students have passion for hard work and they want to achieve their goals.
- **Identify specific issues:** This checklist helps to identify specific psychological issues such as anxiety, depression, substance abuse and emotional distress. Because most students are facing these problems but they can't express. Even their parents are not aware that their child is suffering from that problem.
- **Assessment of Severity:** It allows professionals to assess the severity of each problem, enabling them to prioritize intervention based on urgency.
- **Treatment Planning:** By systematically documenting their problems, this checklist helps to develop an effective treatment plan.
- **Research and evaluation:** This checklist is used in research settings to study the prevalence of psychological problems within specific populations.
