TACCLE Graham Attwell, 2009 This book is written for classroom teachers who want to know more about e learning and who would like to experiment with designing e learning material to use in their own classrooms It is primarily targeted at secondary teachers but there is no reason why primary school teachers and adult education teachers should not find it useful too The other group we had in mind were those of you still undertaking initial teacher training Although there are some exemplary courses a depressing number of trainee teachers continue to arrive in

the classroom having barely heard the words e learning still less have hands on experience of it

Integration of Process Knowledge into Design Support Systems Hubert Kals, Fred van Houten, 2013-04-17 Design is a fundamental creative human activity This certainly applies to the design of artefacts the realisation of which has to meet many constraints and ever raising criteria The world in which we live today is enormously influenced by the human race Over the last century these artefacts have dramatically changed the living conditions of humans The present wealth in very large parts of the world depends on it All the ideas for better and new artefacts brought forward by humans have gone through the minds of designers who have turned them into feasible concepts and subsequently transformed them into realistic product models The designers have been still are and will remain the leading change agents in the physical world Manufacturability of artefacts has always played a significant role in design In pre industrial manufacturing the blacksmith held the many design and realisation aspects of a product in one hand The synthesis of the design and manufacturing aspects took almost implicitly place in the head of the man All the knowledge and the skills were stored in one person Education and training took place along the line of many years of apprenticeship When the production volumes increased assembling to measure was no longer tolerated and production efficiency became essential design process planning production planning and fabrication became separated concerns The designers created their own world separated from the production world They argued that restrictions in the freedom of designing would badly influence their creativity in design *Robin Williams DVD Design Workshop* John Tollett, Robin Williams, David Rohr, 2004 Robin Williams DVD Design Workshop provides a clear accessible introduction to the world of DVD menu design and authoring If you re an amateur video artist home movie buff or professional designer you can use this book as a great introduction to learning how to create DVDs for your personal use or professional projects John Tollett David Rohr and Robin Williams make it easy by presenting necessary technical information and design inspiration in the classic informal and friendly style that has made Robin s books continual best sellers Robin Williams DVD Design Workshop provides all of the information you need to understand the DVD authoring process and to get started with your own DVD projects You ll learn about the advantages of the DVD format applications of DVD technology hardware requirements and the pros and cons of various consumer vs prosumer DVD authoring tools The book also includes overviews of leading Mac and PC DVD authoring software tools such as iDVD MyDVD DVD Studio Pro DVD Producer and more To get you inspired the authors include examples of successful and sometimes unusual DVD interface designs from professional designers and major Hollywood studios Valuable outsource resources for packaging and distributing your own DVD are also included *The Complete Directory of Automated Design Software* Neal Weinstock, 1990 **The Johns Hopkins University Digital Portfolio and Guide** Johns Hopkins University.
