Alternative Lending Promitheas Peridis, 2022-09-30 The book covers alternative lending using the emergence of Debt Funds in the EU as a case study The book explores the risks that they can pose to financial stability and the regulatory and supervisory tools available to mitigate these risks Through this analysis the book uncovers the risks and potential risk mitigation tools that can be applied to the alternative lenders including debt funds and other potential alternative lenders After identifying the reasons behind the growth of alternative lenders using as example the assets of Alternative Investment Funds AIFs and in particular debt funds and the simultaneous decrease of the banks assets the book analyses the systemic importance of the alternative lenders and the risk channels through which the systemic risk can spread to the banking sector and the financial system Then the book deals with the financial innovation market failure theory and demonstrates that financial innovations e g debt funds securitisations can cause market failures resulting in regulatory interventions Of interest to banking and financial regulation academics researchers and practitioners this book analyses the regulatory provisions in place for both credit institutions and debt funds including the Basel Accords the Capital Requirements Directives and Regulations and the Alternative Investment Fund Managers Directive AIFMD and its implementation in various EU jurisdictions before offering a proposal for a new three defensive framework applicable to debt funds and to other potential alternative lenders

Building on the core foundations of Anthropological Economics: Our second tranche of extensions on Anthropological Economics Sujay Rao Mandavilli, 2026-01-10 The concepts of anthropological economics were introduced by us in the year 2020 in a paper entitled Introducing Anthropological Economics The quest for an Anthropological basis for Economic theory growth models and policy development for wealth and human welfare maximization and was published in the journal ELK Asia Pacific Journal of Social Sciences Volume 6 Issue 3 April June 2020 The paper was subsequently published in Google books later in the same year Subsequently several other papers were also published The objective of our work on anthropological economics has been to attempt to merge the concepts and theoretical frameworks of the disciplines of Anthropology and Economics thereby creating a new sub field in Economics called Anthropological Economics which is mired in Anthropological concepts and principles and sought to maximize not only human welfare and happiness but also wealth maximization across cultures while considering both the psychic unity of man universal human needs and culturespecific factors Thus the field of Anthropological Economics is expected to be inter related to other disciplines of Economics but remain complementary to them i e it is not expected that it would intrude into other sub fields of economics replace them or override their principles in any way It would therefore we anticipated draw upon other aspects of economic theory and enrich them suitably It is therefore expected that all aspects of Economic theory would be taken into consideration for policy formulation and decision making including those of Anthropological economics and independent context specific judgment would always be applied The new and novel proposed field of Anthropological Economics proposes

to take the idea of Human Welfare to its logical conclusion by extending the work already carried out in various sub disciplines of economics such as those proposed by Amartya Sen and others and integrate it more tightly with various concepts in Anthropology Many new tools and techniques have therefore been proposed as a part of our overall work and we believe these would suitably enrich the field of Economics as well While many attempts have been made in the past to integrate the fields of Anthropology and Economics we hope anticipate expect and believe that 3 our endeavour would take this exercise to a much higher level by creating a new generation of Anthroeconomists We also hope that it will eventually help move mainstream economics away from Neo classical approaches what we prefer to call legacy economics at this point in time to Anthropological and human centric approaches The present volume presents our second tranche of additional and auxiliary concepts in anthropological economics The present volume must be read after the contents of the first two previous volumes have been fully read and ingested We say this in the interests of absolute reader clarity This is because the original paper and the previous extensions have not been reproduced here

21st Century Economics: A Reference Handbook

Rhona C. Free,2010-05-14 Interest in economics is at an all time high Among the challenges facing the nation is an economy with rapidly rising unemployment failures of major businesses and industries and continued dependence on oil with its wildly fluctuating price Americans are debating the proper role of the government in company bailouts the effectiveness of tax cuts versus increased government spending to stimulate the economy and potential effects of deflation Economists have dealt with such questions for generations but they have taken on new meaning and significance Tackling these questions and encompassing analysis of traditional economic theory and topics as well as those that economists have only more recently addressed 21st Century Economics A Reference Handbook is intended to meet the needs of several types of readers

Undergraduate students preparing for exams will find summaries of theory and models in key areas of micro and macroeconomics Readers interested in learning about economic analysis of an issue as well students embarking on research projects will find introductions to relevant theory and empirical evidence And economists seeking to learn about extensions of analysis into new areas or about new approaches will benefit from chapters that introduce cutting edge topics To make the book accessible to undergraduate students models have been presented only in graphical format minimal calculus and empirical evidence has been summarized in ways that do not require much background in statistics or econometrics It is thereby hoped that chapters will provide both crucial information and inspiration in a non threatening highly readable format
