Worlds E. Granum, Lars Qvortrup, B. Holmqvist, S. Kolstrup, K. Halskov Madsen, 2013-03-09 Lars Qvortrup The world of interactive 3D multimedia is a cross institutional world. Here researchers from media studies, linguistics, dramaturgy, media technology, 3D modelling, robotics, computer science, sociology, etc. etc. meet. In order not to create a new tower of Babel, it is important to develop a set of common concepts and references. This is the aim of the first section of the book. In Chapter 2, Jens F. Jensen identifies the roots of interaction and interactivity in media studies, literature studies and computer science, and presents definitions of interaction as something going on among agents and objects and of interactivity as a property of media supporting interaction. Similarly, he makes a classification of human users, avatars, autonomous agents and objects, demonstrating that no universal differences can be made. We are dealing with a continuum. While Jensen approaches these categories from a semiotic point of view, in Chapter 3 Peer Mylov discusses similar issues from a psychological point of view.
