Climate Change Joseph Romm,2015-11-05 Climate change will have a bigger impact on humanity than the Internet has had The last decade s spate of superstorms wildfires heat waves and droughts has accelerated the public discourse on this topic and lent credence to climatologist Lonnie Thomson s 2010 statement that climate change represents a clear and present danger to civilization In June 2015 the Pope declared that action on climate change is a moral issue This book offers the most up to date examination of climate change s foundational science its implications for our future and the core clean energy solutions Alongside detailed but highly accessible descriptions of what is causing climate change this entry in the What Everyone Needs to Know series answers questions about the practical implications of this growing force on our world How will climate change impact you and your family in the coming decades What are the future implications for owners of coastal property Should you plan on retiring in South Florida or the U S Southwest or Southern Europe What occupations and fields of study will be most in demand in a globally warmed world What impact will climate change have on investments and the global economy As the world struggles to stem climate change and its effects everyone will become a part of this story of the century Here is what you need to know

Food in America Andrew F. Smith,2017-02-16 This three volume work examines all facets of the modern U S food system including the nation s most important food and agriculture laws the political forces that shape modern food policy and the food production trends that are directly impacting the lives of every American family Americans are constantly besieged by conflicting messages about food the environment and health and nutrition Are foods with genetically modified ingredients safe Should we choose locally grown food Is organic food better than conventional food Are concentrated animal feed operations destroying the environment Should food corporations target young children with their advertising and promotional campaigns This comprehensive three volume set addresses all of these questions and many more probing the problems created by the industrial food system examining conflicting opinions on these

complex food controversies and highlighting the importance of food in our lives and the decisions we make each time we eat. The coverage of each of the many controversial food issues in the set offers perspectives from different sides to encourage readers to examine various viewpoints and make up their own minds. The first volume *Food and the Environment* addresses timely issues such as climate change, food waste, pesticides, and sustainable foods. Volume two, entitled *Food and Health and Nutrition*, addresses subjects like antibiotics, food labeling, and the effects of salt and sugar on our health. The third volume *Food and the Economy* tackles topics such as food advertising and marketing, food corporations, genetically modified foods, globalization, and megagrocery chains. Each volume contains several dozen primary documents that include firsthand accounts written by promoters and advertisers, journalists, politicians, and government officials, and supporters and critics of various views related to food and beverages, representing speeches, advertisements, articles, books, portions of major laws, and government documents, to name a few. These documents provide readers with additional resources from which to form informed opinions on food issues.

Climate Change Communication Daniel James Scott, Canada. Environment Canada, University of Waterloo, 2000. Proceedings of a conference that provided a foundation to begin addressing matters related to communicating the climate change issue in order to raise awareness, confer understanding, and motivate action. Presentations are organized under the following themes: climate change perceptions among scientists; influences on public understanding of climate change; organizational roles in communicating about climate change; national climate change perceptions among the public; assessment of media representations of climate change; promotion of community action; stakeholder framing of climate change; communication and the science policy interface; lessons for civic engagement from other participatory processes; social marketing strategies; community-based communication strategies; climate change education through science fiction; climate change curriculum development; values and responsibility scenarios as communication tools; engaging youth; linking climate change knowledge; stakeholder engagement in the agricultural sector; motivating change; developing an international climate change communication network; communication of natural variability; the role of libraries; and climate change from an Inuit perspective. The final section includes summaries of conference workshops, public forums, and poster papers.
