## Nursing Dynamics:

**Nursing Dynamics** Marie Eloise Muller, Muller, 2003-12-01      *Nursing Dynamics* Marie Elizabeth Muller, Petra Bester, 2016 Since its first publication in 1996 Marie Muller's *Nursing Dynamics* has become firmly established as an essential resource for nursing courses. This new edition addresses the latest challenges faced by nursing professionals and expands the focus to include all managers in healthcare service management. Nursing and midwifery educators who relied on earlier editions of this work will find that their discipline is still the core of this book with the management aspects broadened to include general healthcare dynamics. Subjects range from professional regulation to governance, decision making, financial management, quality management and continuing professional development. A new feature of the book is the introduction of digital elements including QR codes, online student lecturer support material and a digital portfolio of evidence. The practical application of principles has been formalised with the inclusion of case studies and assignments at the end of each chapter. These exercises follow a Head Heart Hands model covering the knowledge behind the principle, the ethical and duty of care considerations and the hands on application page 4 of cover.

**Community Health Nursing** Karen Saucier Lundy, Sharyn Janes, 2009 Historically community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings. *Community Health Nursing: Caring for the Public's Health* Second Edition reflects this response and is representative of what communities signify in the United States a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population based nursing directed toward health promotion and primary prevention in the community. It is both community based and community focused reflecting the current dynamics of the health care system. The Second Edition contains new chapters on disaster nursing and community collaborations during emergencies. The chapters covering Family health, ethics, mental health and pediatric nursing have all been significantly revised and updated.
