## **Nursing Health Assessment A Best Practice Approach:**

*Nursing Health Assessment* Sharon Jensen, 2010-10 *Nursing Health Assessment A Best Practice Approach* reflects a progressive and modern view of nursing practice. The text combines elements of traditional Health Assessment texts with innovative elements that facilitate understanding of how best to obtain accurate data from patients. It not only includes thorough and comprehensive examinations for each specific topic but also presents strategies for adapting questions and techniques when communication is challenging. The patient's responses are unexpected or the patient's condition changes over time. Unique features assist with application and analysis, enhancing critical thinking skills and better preparing all readers for active practice. A real life approach is introduced at the beginning of each chapter and continued throughout. This includes recurring features that provide related questions, additional data, and variations that challenge one to modify responses. These cases encourage the progressive building and synthesis of knowledge. In addition to the case studies, other distinctive aspects of this text include the following: Emphasis on health promotion, risk factor reduction, evidence-based critical thinking, and diagnostic reasoning. The end of the chapter demonstrates how to use critical thinking and diagnostic reasoning to cluster data and to analyze findings. End of chapter review sections contain questions and critical thinking challenges related to the previously established case study. Additionally, the last section of each chapter focuses on prioritizing and modifying assessment to promote the best care possible and summarizing multiple findings to create appropriate plans for patient's health. *Pocket Guide for Nursing Health Assessment* Sharon Jensen, 2014-11-07 The second edition of the Pocket Guide is designed to work as a clinical handbook and up to date reference for nurses when interviewing patients of all age groups and cultural backgrounds, taking health histories, promoting health, and performing physical assessments. The content derives from and has been developed in conjunction with Jensen's *Nursing Health Assessment A Best Practice Approach* and serves to both review the core content provided in the textbook as well as help students apply their foundational learning through reinforcement and streamlined presentation. The content focuses on key questions in the area of health promotion, reviewing important risk factors and outlining essential teaching points for risk assessment and intervention. It includes essential questions to review common and concerning signs and symptoms for each health assessment topic. The chapters review the key techniques of examination, outlining normal and unexpected findings. Finally, tables of findings provide a quick reference by which students can compare and contrast results to assist with eventual nursing and medical diagnoses. **Canadian**
