Case Studies in Clinical Nutrition Corinne Hogden Robinson, 1982 Abstract: A workbook format is used to aid students of nursing dietetics and dietetic technology through analysis of case studies in which knowledge of normal and therapeutic nutrition must be applied to real life situations. The case studies include 5 situations in the normal life cycle and 24 clinical situations needing dietary modification and nutritional care. Constant emphasis is placed on the individual in question as a unique being affected by socioeconomic, mental, environmental, and emotional factors under the additional influences of physiologic and pathologic stress. The problem solving approach is used by grouping questions into 4 relevant categories.
