Philosophy, Learning and the Mathematics Curriculum Xuehui Xie, Phil Francis Carspecken, 2019-02-18 Mathematics curriculums used in progressive classrooms of the United States and in classrooms of the People s Republic of China presuppose markedly different philosophies Xie and Carspecken reconstruct different assumptions operating implicitly within mathematics curriculums developed by the Ministry of Education in China and NCTM in the United States Each curriculum is constructed upon a deep structure holistically integrating presuppositions about the nature of the human self society learning processes language concepts human development freedom authority and the epistemology and ontology of mathematical knowledge Xie and Carspecken next present an extended discussion of the two main philosophical traditions informing these curriculums dialectical materialism in the case of the Chinese mathematics curriculum and Dewey s instrumental pragmatism in the case of NCTM Both philosophies were developed as movements out of Hegelian idealism while retaining the anti dualist and anti empiricist insights of Hegel s thought The history of dialectical materialism and Dewey s instrumentalism is carefully examined by the authors to identify both similarities and sharp differences in the resulting mature philosophies Drawing upon more recent philosophies of intersubjectivity Brandom Habermas and dialectical materialist psychologies Vygotsky Luria the authors conclude this book with arguments for overcoming the limitations of a purely instrumentalist framework and for expanding potentialities implicit within dialectical philosophies This book will be of value to a broad audience including mathematics educators philosophers curriculum theorists social theorists and those who work in comparative education and learning

science Standards-based School Mathematics Curricula Sharon L. Senk,Denisse R. Thompson,2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research In addition to the references provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula including professors and graduate students interested in mathematics education curriculum development program evaluation or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research *The Secondary School Mathematics Curriculum* ,1985 **New York Math: Math A** ,2000 **The Secondary School Mathematics Curriculum** Christian R.
