The Quick Theory Reference Guide Karin Jordan,2007 Since the beginning of the concepts of family therapy mental health professionals have known that the family the system is a powerful source of support for change or a powerful force for resistance to change Some professionals work with individuals some with families and some with groups However all work with the context of the systems family group community country etc Students especially beginning students are overwhelmed

and confused at the variety of approaches to working with clients Many programs introduce students to individual as well as systems concepts in the course of training Students need assistance in learning this variety of theories They need to be able to compare and contrast theories and techniques to determine when and where to utilise the best skills in order to facilitate client change Dr Karin Jordan has compiled a comprehensive text that enables the students to discover each theory as it is presented in its purist form The text is accessible yet the content provides comprehensive knowledge of each theory Dr Jordan has brought together the master educators and clinicians in our fields to write about their particular expertise The Interface of Individual and Family Therapy Stuart Sugarman,1986 **Object Relations and the Family Process** Randall Klein,1990-01-09 Joining two usually distinct areas of psychoanalytic treatment this volume explores the psychoanalytic theory of object relations and its application to the study of marital and family interaction Freud s object relations model lends itself well to the study of internalized object relations and external personal relations Integrating various psychoanalytic approaches as well as contributions of Piagetian scholars this essay also incorporates general systems theory The study covers the breakdown of marital relationships narcissism of partners separation and individuation of adolescent offspring role typing family communication defense mechanisms entrapping and emotional processes It concludes with a synthesis of marital and family object relations models Object Relations and the Family Process introduces the reader to the object relations model It describes the process of acquiring object concepts of both permanence and libidinal strivings The concept of libidinal object is then defined An overview of the psychoanalytic theory of object relations is given and the intrapersonal and interpersonal spheres of object relations are described The remainder of the book is devoted to the author s presentation of his hypothetical model Both psychoanalysts and therapists will find this model a useful one *Object Relations Family Therapy* David E.
