[World Day for Safety and Health at Work 2023](#) Maria Malliarou, Antonio Caputi , Luigi De Maria,2024-07-29 The World Day for Safety and Health at Work takes place annually on the 28th of April to globally promote the prevention of accidents and diseases at work The International Labour Organisation ILO began to observe this day in 2003 to promote a

safe and healthy work environment as a fundamental principle and right at work through collaboration and encouraging open social dialogue We have learned from past and ongoing crises such as the COVID 19 pandemic that workplaces can be of vital importance in the prevention and control of outbreaks During this unprecedented period it was demonstrated that effective participation and communication between governments employers and workers had an essential role in transforming occupational health and safety systems through implementing effective health and safety measures in the workplace to contain the spread of disease systems were built that not only safeguarded the health and safety of workers but protected and upheld the health of society at large In addition these measures allowed important services to continue in confidence with health and safety being at the forefront **Power and Progress** Daron Acemoglu,Simon Johnson,2023-05-16 Awarded the 2024 Nobel Prize in Economics Daron Acemoglu and Simon Johnson overturn conventional wisdom about how economies work revealing the untold story of who wins and who loses the rewards of prosperity in a work that fundamentally transforms how we look at and understand the world Throughout history technological change whether it takes the form of agricultural improvements in the Middle Ages the Industrial Revolution or today s artificial intelligence has been viewed as a main driver of prosperity working in the public interest The reality though is that technology is shaped by what powerful people want and believe generating riches social respect cultural prominence and further political voice for those already powerful For most of the rest of us there is the illusion of progress Daron Acemoglu and Simon Johnson debunk modern techno optimism through a dazzling original account of how technological choices have changed the course of history From vivid stories of how the economic surplus of the Middle Ages was appropriated by an ecclesiastical elite to build cathedrals while the peasants starved to the making of vast fortunes from digital technologies today as millions are pushed towards poverty we see how the path of technology is determined and who influences its trajectory To achieve the true potential of innovation we need to ensure technology is creating new jobs and opportunities rather than marginalizing most people through automated work and political passivity We need to use the tremendous digital advances of the last half century to create useful and empowering tools and seize back control from a small elite of hubristic messianic tech leaders pursuing their own interests With their breakthrough economic theory and manifesto for building a better society Acemoglu and Johnson provide the understanding and vision to reimagine and reshape the path of technology and create true shared prosperity
