

Introducing the

The Model 20-2740 is the world's first general-purpose electronic scale. The Model 20-2740 is microprocessor controlled and includes a built-in, rechargeable battery. The built-in battery power allows continuous, unattended, 24-hour operation. It also allows scaling, the program continuously calculates temperature, density, and density-volume percentage.

Digital display indicates actual mass, mass percentage, fat, water, moisture or alcohol content, alcohol percentage, and alcohol-water ratio. The display also features a timer.

Four sealed sensors with light finger protection. These are placed directly over the sensor or through windows. There is an audible tone "bong" when a weight is placed and removed.

The Model 20-2740 operates in the following functions: mass, and density modes. In density mode, the user places the liquid in the sensor and the unit displays the density. In mass mode, the user places the sample in the sensor and the unit displays the mass. The Model 20-2740 also has a temperature and density mode. The sensor is placed in the liquid and the unit displays the density. The density mode is used for all other applications.

The design and construction of the unit are extremely rugged. It is built to withstand the most severe conditions. It is built to be used in the laboratory, in the field, and in the home. The unit is built to be used in the laboratory, in the field, and in the home. The unit is built to be used in the laboratory, in the field, and in the home.
