**Distinguished Figures in Descriptive Geometry and Its Applications for Mechanism Science** Michela Cigola,2015-07-27 This book consists of chapters that focus specifically on single figures that worked on Descriptive Geometry and also in Mechanisms Sciences and contain biographical notes a survey of their work and their achievements together with a modern interpretation of their legacy Since Vitruvius in ancient times and with Brunelleschi in the Renaissance the two disciplines began to share a common direction which over the centuries took shape through less well known figures until the more recent times in which Gaspard Monge worked Over the years a gap has been created between Descriptive Geometry and Mechanism Science which now appear to belong to different worlds In reality however there is a very close relationship between the two disciplines with a link based on extremely solid foundations Without the theoretical foundations of Geometry it would not be possible to draw and design mechanical parts such as gears while in Kinematics it would be less easy to design and predict the reciprocal movements of parts in a complex mechanical assembly *Galileo Galilei, The Tuscan Artist* Pietro

Greco,2018-04-19 This book is a distinctively original biography of Galileo Galilei probably the last eclectic genius of the Italian Renaissance who was not only one of the greatest scientists ever but also a philosopher a theologian and a man of great literary musical and artistic talent The Tuscan Artist as the poet John Milton referred to him Galileo was exceptional in simultaneously excelling in the Arts Science Philosophy and Theology These diverse aspects of his life were closely intertwined indeed it may be said that he personally demonstrated that human culture is not divisible but rather one with a thousand shades Galileo also represented the bridge between two historical epochs As the philosopher Tommaso Campanella a contemporary of Galileo recognized at the time Galileo was responsible for ushering in a new age the Modern Age This

book which is exceptional in the completeness of its coverage explores all aspects of the life of Galileo as a Tuscan artist and giant of the Renaissance in a stimulating and reader friendly way      **Studies in Philosophy and the History of Philosophy** John Kenneth Ryan,1986      *Complete Catalog* Smithsonian Institution.
