New York Regents Geometry Reference Sheet:

A Primer of Mathematical Writing Steven G. Krantz, 2017-11-07 This is the second edition of a book originally published in 1997. Today the internet virtually consumes all of our lives especially the lives of writers. As both readers and writers we are all aware of blogs, chat rooms and preprint servers. There are now electronic only journals and print on demand books, Open Access journals and joint research projects such as MathOverflow not to mention a host of other new realities. It truly is a brave new world one that can be overwhelming and confusing. The truly new feature of this second edition is an extensive discussion of technological developments. Similar to the first edition, Krantz's frank and straightforward approach makes this book particularly suitable as a textbook for an undergraduate course.

Ethnomathematics of Negev Bedouins' Existence in Forms, Symbols and Geometric Patterns Ada Katsap, Fredrick L. Silverman, 2015-12-17 Ethnomathematics of Negev Bedouins Existence in Forms, Symbols and Geometric Patterns provokes a journey into the world of Negev Bedouins and attests to the beauty and sophistication of mathematics that occurs naturally in their craftwork structures, games and throughout Bedouin life. The major focus is Bedouin women's traditional craftwork by which they reflect social and cultural activities in their weaving, embroidery and similar pursuits. Their creations reveal mathematical ideas incorporated in embroidery compositions in repeated patterns of flowers and geometric figures in varying scales. The women use ground staked looms stabilized by block stones to make multi-color repeating pattern strip rugs in a process practiced for generations. An image of this appears in the book's cover photo.

collage Bedouin men construct dwellings tents desert wells and such They and their children play games attuned to sand and other specific desert conditions These activities of Bedouin women men and children require mathematical thinking and strategic reasoning to achieve desired outcomes The book opens with a narrative of Bedouin history followed by a brief overview of ethnomathematics and concludes with discussion about bridging the gap between school mathematics experiences and those outside school It considers mathematically problematic situations embedded in Bedouin sociocultural heritage likely to appeal to teachers for use with school students The book is intended for a diverse audience from Bedouin communities in different countries to the general public and professionals including ethnomathematicians and mathematics educators Numerous photographs document the examples of Bedouin ethnomathematics They are the subject of considerable analysis and appear throughout the book
