Poe, Saeid Mokhatab, 2016-09-09 Modeling Control and Optimization of Natural Gas Processing Plants presents the latest on the evolution of the natural gas industry shining a light on the unique challenges plant managers and owners face when looking for ways to optimize plant performance and efficiency including topics such as the various feed gas compositions

temperatures pressures and throughput capacities that keep them looking for better decision support tools The book delivers the first reference focused strictly on the fast growing natural gas markets Whether you are trying to magnify your plants existing capabilities or are designing a new facility to handle more feedstock options this reference guides you by combining modeling control and optimization strategies with the latest developments within the natural gas industry including the very latest in algorithms software and real world case studies Helps users adapt their natural gas plant quickly with optimization strategies and advanced control methods Presents real world application for gas process operations with software and algorithm comparisons and practical case studies Provides coverage on multivariable control and optimization on existing equipment Allows plant managers and owners the tools they need to maximize the value of the natural gas produced
