### Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges

Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response a series of international discussions on the nature of dual use life science arose. These discussions addressed the complex social, technical, political, security and ethical issues related to dual use research. This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives

### **Metaverse and Web 3.0 Era: Intersecting Food, Technology, and Culture**

Alhussaini Hamad, Ahmed M., Soni, Rashmi, 2025-02-13 In the ever evolving landscape of technology the emergence of the metaverse and web 3.0 is set to revolutionize how we interact, work and eat. From virtual restaurants and augmented reality to personalized nutrition apps and blockchain powered food traceability the metaverse and web 3.0 are transforming the food industry. Digital dining experiences are on the rise while social media and influencer culture continue to impact food trends. The potential of emerging technologies such as 3D food printing, lab grown meat and smart agriculture revolutionize the way we produce, distribute and consume food. Further research into these technologies may reveal their impact on the future of food in the digital age. Food in the Metaverse and Web 3.0 Era: Intersecting Food Technology and Culture explores the intersection of food technology and culture offering insights into the future of gastronomy and culinary experiences. It examines the evolving relationship between food and technology and encourages reimagined possibilities for the future of food. This book covers topics such as influencer marketing, food science and machine learning and is a useful resource for computer engineers, data scientists, sociologists, business owners, healthcare workers, academicians and researchers
