[Advanced Metasearch Engine Technology](#) Weiyi Meng,Clement T. Yu,2011 Among the search tools currently on the Web search engines are the most well known thanks to the popularity of major search engines such as Google and Yahoo While extremely successful these major search engines do have serious limitations This book introduces large scale metasearch engine technology which has the

potential to overcome the limitations of the major search engines. Essentially a metasearch engine is a search system that supports unified access to multiple existing search engines by passing the queries it receives to its component search engines and aggregating the returned results into a single ranked list. A large scale metasearch engine has thousands or more component search engines. While metasearch engines were initially motivated by their ability to combine the search coverage of multiple search engines, there are also other benefits such as the potential to obtain better and fresher results and to reach the Deep Web. The following major components of large scale metasearch engines will be discussed in detail in this book: search engine selection, search engine incorporation and result merging. Highly scalable and automated solutions for these components are emphasized. The authors make a strong case for the viability of the large scale metasearch engine technology as a competitive technology for Web search.

Success with STEM Sue Howarth, Linda Scott, 2014-11-13

Success with STEM is an essential resource packed with advice and ideas to support and enthuse all those involved in the planning and delivery of STEM in the secondary school. It offers guidance on current issues and priority areas to help you make informed judgements about your own practice and argue for further support for your subject in school. It explains current initiatives to enhance STEM teaching and offers a wide range of practical activities to support exciting teaching and learning in and beyond the classroom. Illustrated with examples of successful projects in real schools, this friendly inspiring book explores innovative teaching ideas to make lessons buzz. Activities for successful practical work, Sourcing additional funding, Finding and making the most of the best resources, STEM outside the classroom, Setting up and enhancing your own STEM club, Getting involved in STEM competitions, fairs and festivals, Promoting STEM careers and tackling stereotypes, Health, safety and legal issues, Examples of international projects, An wide ranging list of project and activity titles. Enriched by the authors extensive experience and work with schools, Success with STEM is a rich compendium for all those who want to develop outstanding lessons and infuse a life long interest in STEM learning in their students. The advice and guidance will be invaluable for all teachers, subject leaders, trainee teachers and NQTs.

Science Activities, 1999

Science Activities Using the World Wide Web Kathy Sage, 1999

Get kids wired up then fired up with this step by step guide to using the Internet to study six science topics: flight, germs, simple machines, sharks, the digestive system and weather. Each topic includes Web search directions, Web addresses and model lessons for the whole class, small groups or individuals. Reproducible and clear directions for both teachers and students make this book a practical tool to blend teaching with technology.
