**Accentuate the Positive** Beth R. Bernhardt, Leah H. Hinds, Katina P. Strauch, 2013 Almost one hundred presentations from the 32nd annual Charleston Library Conference held November 7-10, 2012 are included in this annual proceedings volume. Major themes of the meeting included alternative metrics for measuring impact, patron driven acquisition, Open Access monographs, the future of university presses and techniques for minimizing duplication and emphasizing the unique in library collections. While the Charleston meeting remains a core one for acquisitions librarians in dialog with publishers and vendors, the breadth of coverage of this volume reflects the fact that this conference is now one of the major venues for leaders in the publishing and library communities to shape strategy and prepare for the future. Almost 1,500 delegates attended the 2012 meeting, ranging from the staff of small public library systems to the CEOs of major corporations. This fully indexed, copyedited volume provides a rich source for the latest evidence based research and lessons from practice in a range of information science fields. The contributors are leaders in the library, publishing and vendor communities.

*Linux for Makers* Aaron Newcomb, 2017-04-11 Linux is a powerful open source operating system that has been around for many years and is widely used for running servers and websites. But most students and Makers encounter it for the first time when they are working on projects with their Raspberry Pi or similar single board computers (SBCs) such as BeagleBone Black or Intel Galileo. Linux for Makers is the first book that explains the Linux operating system specifically for Makers as opposed to programmers and administrators. By gaining a deeper understanding of Linux, Makers can add another useful tool to their kit that will help them build their projects more easily. Written with the Maker in mind, this book will focus mostly on Raspbian running on the Raspberry Pi as it is the most prolific in the ecosystem today. However, most of the topics covered will apply broadly to other Linux distributions and will be called out when they may differ. Many times users cut and paste from a

website tutorial into the Linux command line without understanding what they are actually doing only to be frustrated when they want to modify or tweak something to suit their needs Also many Makers shy away from using the Raspberry Pi or similar board because they feel Linux is too foreign and they think using a command line will be more difficult than using a GUI This book aims to overcome those fears and provide a foundation for further learning and exploration To that end this book will focus on the basic principles that a Maker would need to know as opposed to other resources that go into detail that is not particularly relevant to building projects
