**98-372 . NET Fundamentals ExamFOCUS Study Notes and Review Questions 2013 Exam** REVIEW, 2013-08-12 The Microsoft Technology Associate MTA certification is an entry level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist MCTS or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP or MCPD certifications. The MTA certification focuses more on knowledge and a little less on skills. There are several objectives covered in the .NET Fundamentals exam including Object Oriented Programming, Data Types and Collections, Events and Exceptions, Code Compilation and Deployment, I/O Classes, Security. For the exam, programming language is not the biggest issue. It is the concept behind the development effort that is important. This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome. **MCSA: Windows**
