Competing with Disruptive Business Models in Traditional Industries. Conceptualisation of a Strategic Framework Nils Berkemeyer, 2016-05-06 Master s Thesis from the year 2015 in the subject Business economics Business Management Corporate Governance grade 1 0 Cass Business School language English abstract An increasing number of journalistic articles and academic literature deal with the struggle of established companies to fend off the attacks by industry newcomers such as Airbnb Spotify Netflix Google and many others These companies enter traditional industries with innovative business models and compete in a manner which makes it challenging for incumbent firms to understand their

novel competition and respond effectively This study introduces a typology of three stages of industry disruption that classify the newcomer's developmental stage and describe the incumbent's competitive position in terms of competition intensity and remaining time to respond It is demonstrated how incumbents may conduct their strategic reasoning along these stages to arrive at a strategic goal and evaluate possible counter measures

**Adoption of Smart Home Speakers** Jakob Summer,2023-04-05 Master's Thesis from the year 2021 in the subject Business economics General grade 1 00 Management Center Innsbruck Management Center Innsbruck language English abstract Due to technological progress smart speakers have entered the market in recent years and have already been adopted by certain parts of the population Although several studies have tried to explain the crucial factors for smart speaker adoption there is still no common understanding and there are significant gaps in the literature analysing the adoption of smart speakers at their current technical level in specific countries Therefore this study aims to identify factors influencing the intention to use smart speakers in Germany By reviewing the literature on innovation acceptance with an emphasis upon adoption studies of voice controlled technologies the research model of this thesis was developed The

hypothesized effects of the twelve constructs in the model were tested using an online survey with questionnaires as data collection instruments among 233 German non adopters. The study found that certain constructs specifically enjoyment, privacy concerns, usefulness and social influence were significant predictors of intention to use. System quality and smart speaker complementarity with apps and services additionally emerged as predictors of perceived usefulness. Results suggest that companies should pay particular attention to these factors when marketing and further developing smart speakers. The factors identified might further influence the acceptance of similar IT products. *WIPO Magazine*, 2015

**Introduction to Information Systems** R. Kelly Rainer, Brad Prince, 2020-05-07

The goal of *Introduction to Information Systems* is to teach undergraduate business students how to use information technology to master their current or future jobs. Students develop a working understanding of information systems and information technology and learn how to apply concepts to successfully facilitate business processes. This product demonstrates that IT is a key component of any business whether a student is majoring in Accounting, Finance, Marketing, Human Resources or Production Operations Management.
