Nesting Body Dwelling Mind:

Nesting Sarah Robinson, 2011 Increasingly technology seems to be de materializing our world Yet our ideas and experiences both physical and cultural remain fundamentally patterned by the complex material interplay of brain body and world With support from pioneering research in the cognitive and neurosciences Sarah Robinson combines philosophy poetry and personal narrative to offer a poignant study of the many ways in which our built environment shapes us as significantly as we have shaped it Nesting Body Dwelling Mind explores how our very being is sculpted by our interactions in an environment that we ourselves have fashioned making us our own greatest artifact Serial Killing on Screen Sarah E.

Fanning, Claire O'Callaghan, 2022-11-30 This book explores the representation of real life serial murders as adapted for the screen and popular culture Bringing together a selection of essays from international scholars Serial Killing on Screen Adaptation True Crime and Popular Culture examines the ways in which the screen has become a crucial site through which the most troubling of real life crimes are represented re constructed and made accessible to the public Situated at the nexus of film and screen studies theatre studies cultural studies criminology and sociology this interdisciplinary collection raises questions about and implications for thinking about the adaptation and representation of true crime in popular culture and the ideologies at stake in such narratives It discusses the ways in which the adaptation of real life serial murder intersects with other markers of cultural identity gender race class disability as well as aspects of criminology offenders victims policing and profiling and psychology psychopathy sociopathy and paraphilia This collection is unique in its combined focus on the adaptation of crimes committed by real life criminal figures who have gained international notoriety for their plural offences including for example Ted Bundy Ian Brady and Myra Hindley Aileen Wuornos Jack the Ripper and the Zodiac and for situating the tales of these crimes and their victims stories within the field of adaptation studies **Mind in**

Architecture Sarah Robinson, Juhani Pallasmaa, 2017-03-03 Leading neuroscientists and architects explore how the built environment affects our behavior thoughts emotions and well being Although we spend more than ninety percent of our lives inside buildings we understand very little about how the built environment affects our behavior thoughts emotions and well being We are biological beings whose senses and neural systems have developed over millions of years it stands to reason that research in the life sciences particularly neuroscience can offer compelling insights into the ways our buildings shape our interactions with the world This expanded understanding can help architects design buildings that support both mind and body In Mind in Architecture leading thinkers from architecture and other disciplines including neuroscience cognitive science psychiatry and philosophy explore what architecture and neuroscience can learn from each other They offer historical context examine the implications for current architectural practice and education and imagine a neuroscientifically informed architecture of the future Architecture is late in discovering the richness of neuroscientific research As scientists were finding evidence for the bodily basis of mind and meaning architecture was caught up in convoluted cerebral games

that denied emotional and bodily reality altogether This volume maps the extraordinary opportunity that engagement with cutting edge neuroscience offers present day architects Contributors Thomas D Albright Michael Arbib John Paul Eberhard Melissa Farling Vittorio Gallese Alessandro Gattara Mark L Johnson Harry Francis Mallgrave Iain McGilchrist Juhani Pallasmaa Alberto Perez Gomez Sarah Robinson **Transforming Issues in Housing Design** Kutay Guler,2023-11-30

TRANSFORMING ISSUES IN HOUSING DESIGN A practical and complete resource for students researchers and practitioners of housing design Transforming Issues in Housing Design delivers a comprehensive vision for the design philosophy psychology efficiency and constitution of housing This collection of articles explores many of the most pressing and relevant issues related to the ongoing transformation of housing design Twenty two contributed chapters discuss the past and current state of housing design how it evolved to become what it is today and finally how it may unfold in the future A team of global experts presents the most up to date research and a diverse and illuminating collection of examples to highlight housing design around the world Readers will also find A thorough introduction to modern housing design and how it relieves and contributes to various social and economic problems Insightful explorations of the built environment interior architecture urban design sustainable living space planning and more Practical discussions of a theoretical framework to make sense of housing design concepts Complete treatments of concepts research and built projects from a diverse range of communities and cultures Perfect for architects and students of urban studies interior design and architecture Transforming Issues in Housing Design will also benefit those who design research and teach housing **Topographies of Memories**

Anita Bakshi,2017-11-09 This book explores new approaches towards developing memorial and heritage sites moving beyond the critique of existing practices that have been the traditional focus of studies of commemoration Offering understandings of the effects of conflict on memories of place as manifested in everyday lives and official histories it explores the formation of urban identities and constructed images of the city Topographies of Memories suggests interdisciplinary approaches for creating commemorative sites with shared stakes The first part of the book focuses on memory dynamics the second on Nicosia the divided capital of Cyprus and the third on physical and material world interventions Design practices and modes of engagement with places of memory are explored making connections between theoretical explorations of memory and forgetting and practical strategies for designers and practitioners Deaf Gain H-Dirksen L. Bauman,Joseph J.

Murray,2014-10-15 Deaf people are usually regarded by the hearing world as having a lack as missing a sense Yet a definition of deaf people based on hearing loss obscures a wealth of ways in which societies have benefited from the significant contributions of deaf people In this bold intervention into ongoing debates about disability and what it means to be human experts from a variety of disciplines neuroscience linguistics bioethics history cultural studies education public policy art and architecture advance the concept of Deaf Gain and challenge assumptions about what is normal Through their in depth articulation of Deaf Gain the editors and authors of this pathbreaking volume approach deafness as a distinct way of

being in the world one which opens up perceptions perspectives and insights that are less common to the majority of hearing persons For example deaf individuals tend to have unique capabilities in spatial and facial recognition peripheral processing and the detection of images And users of sign language which neuroscientists have shown to be biologically equivalent to speech contribute toward a robust range of creative expression and understanding By framing deafness in terms of its intellectual creative and cultural benefits Deaf Gain recognizes physical and cognitive difference as a vital aspect of human diversity Contributors David Armstrong Benjamin Bahan Gallaudet U Hansel Bauman Gallaudet U John D Bonvillian U of Virginia Alison Bryan Teresa Blankmeyer Burke Gallaudet U Cindee Calton Debra Cole Matthew Dye U of Illinois at Urbana Champaign Steve Emery Ofelia Garc a CUNY Peter C Hauser Rochester Institute of Technology Geo Kartheiser Caroline Kobek Pezzarossi Christopher Krentz U of Virginia Annelies Kusters Irene W Leigh Gallaudet U Elizabeth M Lockwood U of Arizona Summer Loeffler Mara L cia Massuti Instituto Federal de Santa Catarina Brazil Donna A Morere Gallaudet U Kati Morton Ronice M ller de Quadros U Federal de Santa Catarina Brazil Donna Jo Napoli Swarthmore College Jennifer Nelson Gallaudet U Laura Ann Petitto Gallaudet U Suvi Pylv nen Kymenlaakso U of Applied Sciences Antti Raike Aalto U P ivi Rain U of Applied Sciences Humak Katherine D Rogers Clara Sherley Appel Kristin Snoddon U of Alberta Karin Strobel U Federal de Santa Catarina Brazil Hilary Sutherland Rachel Sutton Spence U of Bristol England James Tabery U of Utah Jennifer Grinder Witteborg Mark Zaurov *The Outline of Science: The wonders of microscopy.
