Chu, 2004-02-19 Speech coding is a highly mature branch of signal processing deployed in products such as cellular phones communication devices and more recently voice over internet protocol This book collects many of the techniques used in speech coding and presents them in an accessible fashion Emphasizes the foundation and evolution of standardized speech coders covering standards from 1984 to the present The theory behind the applications is thoroughly analyzed and proved Data Analysis and Optimization for Engineering and Computing Problems Pandian Vasant, Igor Litvinchev, Jose Antonio Marmolejo-Saucedo, Roman Rodriguez-Aguilar, Felix Martinez-Rios, 2020-09-08 This book presents the proceedings of The EAI International Conference on Computer Science Applications in Engineering and Health Services COMPSE 2019 The conference highlighted the latest research innovations and applications of algorithms designed for optimization applications within the fields of Science Computer Science Engineering Information Technology Management Finance and Economics and Health Systems Focusing on a variety of methods and systems as well as practical examples this conference is a significant resource for post graduate level students decision makers and researchers in both public and private sectors who are seeking research based methods for modelling uncertain and unpredictable real world problems

**Fuzzy Systems** Ahmad Taher Azar, 2010-02-01 While several books are available today that address the mathematical and philosophical foundations of fuzzy logic none unfortunately provides the practicing knowledge engineer system analyst and project manager with specific practical information about fuzzy system modeling Those few books that include applications and case studies concentrate almost exclusively on engineering problems pendulum balancing truck backerupers cement kilns antilock braking systems image pattern recognition and digital signal processing Yet the application of fuzzy logic to engineering problems represents only a fraction of its real potential As a method of encoding and using human knowledge in a form that is very close to the way experts think about difficult complex problems fuzzy systems provide the facilities necessary to break through the computational bottlenecks associated with traditional decision support and expert systems Additionally fuzzy systems provide a rich and robust method of building systems that include multiple conflicting cooperating and collaborating experts a capability that generally eludes not only symbolic expert system users but analysts who have turned to such related technologies as neural networks and genetic algorithms Yet the application of fuzzy logic in the areas of decision support medical systems database analysis and mining has been largely ignored by both the commercial vendors of decision support products and the knowledge engineers who use them
