revised edition includes new information and data on the incidence of child sexual abuse and looks more closely at the complexities of sexual abuse by female abusers. An entirely new chapter on False Memory Syndrome is included in this edition which presents both clinical and scientific arguments pertaining to the retrieval of memories as well as analysing the impact of the application of this syndrome not only on victims and survivors but also on therapists and society as a whole. *Counselling Adult Survivors of Child Sexual Abuse* examines the theories which attempt to account for the occurrence of child sexual abuse, explains the traumatic impact of child sexual abuse, looks at the ways in which these effects can be ameliorated and the adult healed. Treatment techniques and the role of the counsellor in employing these techniques are also discussed in such a way that the counsellor can make use of the book not only as a review of current theory but also as a practical handbook for use with clients who may be adult survivors of child sexual abuse.

**Adult Accounts of Organised Child Sexual Abuse in Australia** Michael Salter (Ph. D.), 2010. Organised abuse is an uncommon form of child abuse, however it has been one of the most controversial issues in debates over child abuse, memory and the law. This thesis documents and analyses accounts of organised abuse from twenty-one adult survivors in order to develop a deeper understanding of the range of circumstances and contexts in which organised abuse arises and the forms of abuse to which children are subjected in organised contexts. I draw from a range of feminist and critical masculinity theorists to consider how organised abuse contributes to and crafts relations between men, women and children and how such profoundly abusive relations emerge out of everyday institutions such as the family and school. Within the sexual subcultures of abusive groups, the structured powerlessness of children signifies them as potential objects of exchange between men who seek to affirm masculine domination and accrue status and prestige through shared performances of control, transgression and sexual violence. Whilst the violence of these performances can reach extraordinary heights, the control mechanisms through which children are subjugated to organised abuse rest upon the socially legitimised power of their abusers, who are usually parents, relatives or other authority figures. Since the practices of power through which children are entrapped in organised abuse are normative and widespread, organised abuse is rarely detected in the circumstances in which it arises. Nonetheless, this study has brought to light multiple intervention points through which organised abuse can be disrupted and the harms of organised abuse ameliorated, and identifies a number of opportunities for intervention.
