**Citation Classics from the Journal of Business Ethics** Alex C. Michalos, Deborah C Poff, 2012-08-01 The Journal of Business Ethics was founded by Alex C Michalos and Deborah C Poff and published its first issue in March 1982 It is the most frequently cited business ethics journal in the world The Journal has always offered a multi disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue Its authors and readers are primarily scholars and students in social sciences and philosophy with special interests in the interaction of these disciplines with business or corporate responsibility Since the field of business ethics grew simultaneously with the growth of the Journal a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development In this anniversary volume an overview of citation classics from the Journal is presented the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and or distinguished papers as well as those who served on the Editorial Board and or are recognized as leaders in the field International Encyclopedia of Ergonomics and Human Factors Waldemar Karwowski, 2001 *Review of Current Military Literature*, 1933 *The Seven Military Classics Of Ancient China* Ralph D. Sawyer, 2007-11-06 The Seven Military Classics is one of the most profound studies of warfare ever written Here translated in their entirety for the first time the seven separate essays in this volume written between 500 b c and a d 700 include Sun Tzu s famous Art of War This is the definitive English language edition of a unique contribution to military literature and essential reading for anyone interested in the rich cultural heritage of China Fundamental Issues in Defense Training and Simulation George Galanis, Robert Sottolare, 2017-05-15 Defense forces have always invested a great deal of their resources in training In recent times changes in the complexity and intensity of operations have reaffirmed the importance of ensuring that warfighters are adequately prepared for the environments in which they are required to work The emergence of new operational drivers such as asymmetric threats urban operations joint and coalition operations and the widespread use of military communications and information technology networks has highlighted the importance of providing warfighters with the competencies required to act in a coordinated adaptable fashion and to make effective decisions in environments characterized by large amounts of sometimes ambiguous information While investment in new technologies can make available new opportunities for action it is only through effective training that personnel can be made ready to apply their tools in the most decisive and discriminating fashion There are many factors which can have an impact on the efficacy of training and many issues to consider when designing and implementing training strategies These issues are often complex and nuanced and in order to grasp them fully a significant investment of time and energy is required However the requirement to respond quickly to ever changing technology a high operational tempo and minimal staffing may preclude many in today s defense forces from seeking out all such resources on their own This edited collection provides brief easy to

understand summaries of the key issues in defense training and simulation as well as guidance for further reading It consists of a collection of short essays each of which addresses a fundamental issue in defense training and simulation and features an up to date reference list to enable the reader to undertake further investigation of the issues addressed In essence this book provides the optimum starting point or first resource for readers to come to terms with the important issues associated with defense training and simulation The contributions are written by leading scholars from military research institutions in the US UK Canada Australia and New Zealand as well as selected researchers from academic and private sector research institutions *The Classical Weekly* ,1938 **The Communist Conspiracy: Communism outside the United States.**

*The Open Shelf* ,1917 *The Classical Journal* ,1933 *The Armies of Classical Greece* Everett L. Wheeler,2007 The origin of the Western military tradition in Greece 750 362 BC is fraught with controversies such as the date and nature of the phalanx the role of agricultural destruction and the existence of rules and ritualistic practices This volume collects papers significant for specific points in debates or theoretical value in shaping and critiquing controversial viewpoints An introduction offers a critical analysis of recent trends in ancient military history and provides a bibliographical essay contextualizing the papers within the framework of debates with a guide to further reading *A Scenario-generation Package for Assessing and Training Leader Skills* Richard L. Wampler,2004 This report documents the development of a scenario tool set with variable factors that can be used to assess or train leader skills as the Army transitions to the Future Force The components of the tool set can be tailored to produce 45 basic scenarios Each scenario can be altered by injecting events to create more exercise conditions All source documents needed for leader planning are available to include supplemental map boards each can be modified to conform to the desired exercise requirements A User s Manual containing a step by step guide and a specific example of how to use the scenario tool set is available to assist evaluators and trainers Use of these scenarios requires advanced planning to select the modules components and incidents to create the desired situation The scenarios and resulting exercise vignettes administered in a constructive or virtual simulation will provide a realistic representation of expected battlefield events to allow leader skills to be assessed or trained The scenario tool set can be used to train leader skills or research the impact on leaders of changes in organizations or technological capabilities It can also be used for generating standardized scenarios for analysis purposes
