The First Islamic Reviver Kenneth Garden, 2014-03 The First Islamic Reviver presents a new biography of al Ghazali's final decade and a half presenting him not as a reclusive spiritual seeker but as an engaged Islamic revivalist seeking to reshape his religious tradition *Oriental Mysticism (Dodo Press)* E. H. Palmer, 2010-01-01 Edward Henry Palmer 1840-1882 was an English orientalist. In 1867 he published a treatise on Oriental mysticism based on the Maksud i Aksa of Aziz ibn Mohammad Nafasi. He was engaged in 1869 to join the survey of Sinai undertaken by the Palestine Exploration Fund and followed up this work in the next year by exploring the desert of El Tih in company with Charles Drake. They completed this journey on foot and without escort, making friends among the Bedouin to whom Palmer was known as Abdallah Effendi. The results of this expedition appeared in the Desert of the Exodus 1871 in a report published in the journal of the Palestine Exploration Fund and in an article on the Secret Sects of Syria in the Quarterly Review 1873. In the close of the year 1871 he became Lord Almoner's Professor of Arabic at Cambridge University. His works include Poems of Beha'ed Din Ar and Eng 1876 1877 Arabic Grammar 1874 Persian Dictionary 1876 and English and Persian Dictionary 1883 Ethnozoology Romulo Romeu Nobrega Alves, Ulysses Paulino Albuquerque, 2017-10-23 Ethnozoology: Animals In Our Lives represents the first book about this discipline providing a discussion on key themes on human-animal interactions and their implications along with recent major advances in research. Humans share the world with a bewildering variety of other animals and have interacted with them in different ways. This variety of interactions both past and present is investigated through ethnozoology, which is a hybrid discipline structured with elements from both the natural and social sciences as it seeks to understand how humans have perceived and interacted with faunal resources throughout history. In a broader context, ethnozoology and its companion discipline, ethnobotany, form part of the larger body of the science of ethnobiology. In recent years, the importance of ethnozoological and ethnobiological studies has increasingly been recognized, unsurprisingly given the strong human influence on biodiversity. From the perspective of ethnozoology, the book addresses all aspects of human connection to animals and health, from its use in traditional medicine to bioprospecting derivatives of fauna for pharmaceuticals, with expert contributions from leading researchers in the field. Draws on editors and contributors' extensive research experience and studies covering ethnozoology and ethnobiology. Covers all aspects of human-animal interaction through the lens of this emerging discipline with coverage of both domestic and wild animal topics. Presents topics of great interest to a variety of researchers, including those in wildlife conservation, biologists, ecologists, conservationists, and domestic-related disciplines, psychologists, sociologists.
