Origins Fourteen Billion Years Of Cosmic Evolution:

Origins Neil deGrasse Tyson, Donald Goldsmith, 2004 In this companion to a PBS series the authors explore cosmic science's stunning new insights into the formation and evolution of the universe of the cosmos of galaxies and galaxy clusters of stars within galaxies of planets that orbit those stars and more

Evolve William Spencer, 2023-07-30 Should a species smart enough to foresee its own demise be able to consciously evolve in order to overcome threats to its existence Evolve reveals the nexus of evolutionary biology sustainability and peace on the journey to PACEM 2050 There is a Burning Platform threatening our species Although our species is extremely good at cooperation social polarization is preventing our citizenry from being in adequate alignment to adopt the necessary public policy to mitigate future ecological disaster There are only three scenarios going forward extinction eusocial evolution or a long term cultural intervention to overcome our current lack of conceptual understanding lack of social empathy and lack of decision making to implement the solutions needed to mitigate catastrophe No single government action no corporate solutions or temporary changes in citizen behavior will resolve the challenges we face The problems are interconnected and the path to find solutions represents the solution itself A principle of evolution and of social change is that only the system can change the system PACEM 2050 is the uncharacteristic social change strategy that changes the structure of how we share the realities of sustainability social polarization and approaching ecological tipping points

Teaching Big History Richard B. Simon, 2014-12-23 Big History is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history Weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a

curriculum around it Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History The book includes teaching materials examples and detailed sample exercises This book is also an engaging first hand account of how a group of professors built an entire Big History general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike **New Scientist** ,2005 Astronomy Now ,2006 Patterns ,2004 Environmental Biology Terry Hilleman,2009-01-03 Environmental biology is a study in the conditions of life these conditions impact the life within it The conditions of life are not limited to the present time environmental biology has applications to any time in the history or future of any place on earth or beyond The environment sets limits on the life within it The loss of habitat is the loss of the conditions of life that is loss of habitat is really loss of the conditions of existence necessary for the life within The loss of habitat is the primary cause of extinction This book clearly identifies why habitat destruction is the primary cause of extinction not only for today but for all time It establishes that the degree of habitat destruction is directly proportional to the degree of past extinction event severity Habitat destruction creates changing isolated environments which seem to be a component of both destructive and creative evolutionary change International Who's Who of Authors and Writers 2008 Europa Publications,2007-08-23 An invaluable source of information on the personalities and organizations of the literary world *Media Review Digest* C.
